|----|--|-----------|-------|---|
| | Preventive and countermeasures for Health-Care Associated Infections (HCAI), including COVID-19 | | 28.03 | - |
| | | | 29.03 | 5 |
| | | | 01.04 | 2 |
| | | | 02.04 | 4 |
| | | | 03.04 | - |
| | | | 04.04 | - |
| | | | 05.04 | 3 |
| 6. | Preventive and countermeasures in the focus of infections with transmissible mechanism of transmission (malaria, Lyme disease). Preventive and countermeasures at extremely dangerous infections (cholera, plague, anthrax). Quarantine measures | 5 | 08.04 | 1 |
| | | | 09.04 | - |
| | | | 10.04 | - |
| | | | 11.04 | - |
| | | | 12.04 | 5 |
| | | | 15.04 | 2 |
| | | | 16.04 | 4 |
| | | | 17.04 | - |
| | | | 18.04 | - |
| | | | 19.04 | 3 |
| 7. | Biological safety: basic concepts. Types of biological threats, the system of response to them. Features of anti-epidemic measures in case of emergencies in peacetime, including in the conditions of introduction of pathogens of highly contagious extremely dangerous infections | 4 | 22.04 | 1 |
| | | | 23.04 | - |
| | | | 24.04 | - |
| | | | 25.04 | - |
| | | | 26.04 | 5 |
| | | | 29.04 | 2 |
| | | | 30.04 | 4 |
| | | | 01.05 | - |
| | | | 02.05 | - |
| | | | 03.05 | 3 |
| | TOTAL | 34 | | |

The Table of practical classes was composed on the basis of "The Study Program on Epidemiology, and Biosafety" (2023) and was approved on the meeting of the department of Epidemiology on 10.01.2024 (protocol № 7).

Chief of the Epidemiology Department,
MD., D Med Sci, Prof.

Natalia VYNOGRAD

THE TIME-TABLE OF PRACTICAL CLASSES
on discipline "Epidemiology and Biosafety"
for masters of Vth year's education
faculty of foreign students (222-Medicine)
for spring semester 2023-2024

| <i>Nº</i> | <i>The theme</i> | <i>Quantity hours</i> | <i>Data</i> | <i>Group #</i> |
|-----------|--|-----------------------|--|--|
| 1 | 2 | 3 | 4 | 5 |
| 1. | Basic epidemiological terms and concepts. Modern epidemiological classification of infectious (parasitic) diseases. Structure of the epidemic process and measures of influence on its links. Deratization. Desinsection. Disinfection and Sterilization | 5 | 29.01 30.01 31.01 01.02 02.02 05.02 06.02 07.02 08.02 09.02 | 1 - - - 5 2 4 - - 3 |
| 2. | Immunization of infectious diseases. Schedule of preventive vaccinations. Legal aspects of vaccination. Organization and carrying out of vaccination. Evaluating the effectiveness of immunization. Urgent immunization | 5 | 12.02 13.02 14.02 15.02 16.02 19.02 20.02 21.02 22.02 23.02 | 1 - - - 5 2 4 - - 3 |
| 3. | The system of preventive and countermeasures. Anti-epidemic work of family doctors and infectious disease specialists, including in the focus of infectious diseases. Planning of preventive and countermeasures. Epidemiological method of research and its structure. Analytical and experimental methods in epidemiology | 5 | 26.02 27.02 28.02 29.02 01.03 04.03 05.03 06.03 07.03 08.03 | 1 - - - 5 2 4 - - 3 |
| 4. | Preventive and countermeasures in the focus of infections with the fecal-oral mechanism of transmission (typhoid fever and paratyphoids, hepatitis A). Preventive and countermeasures in the focus of infections with the air-borne mechanism of transmission (diphtheria, measles, COVID-19) | 5 | 11.03 12.03 13.03 14.03 15.03 18.03 19.03 20.03 21.03 22.03 | 1 - - - 5 2 4 - - 3 |
| 5. | Preventive and countermeasures in the focus of infections with the contact mechanism of transmission (HIV-infection, hepatitis B and C). | 5 | 25.03 26.03 27.03 | 1 - - |
