

1. General Information	
Faculty name	Medical Faculty №1
Educational program (branch, specialty, level of higher education, form training)	22 Health care , 221 Medicine , the second (master's) level of higher education , full-time form of education
Academic year	2023-2024
Name of discipline, code (e - mail address on the site of Danylo Halytskyi Lviv National Medical University)	General practice - family medicine ББ 3.2
Department (name, address, phone, e-mail)	Department of Family Medicine 79013, Lviv city, 117 Lychakivska street, <a href="mailto:Kaf_familymedicine@meduniv.lviv.ua">Kaf_familymedicine@meduniv.lviv.ua</a>
Head of department ( e - mail address )	professor, doctor of medical sciences Nadashkevich O.N. , <a href="mailto:Kaf_familymedicine@meduniv.lviv.ua">Kaf_familymedicine@meduniv.lviv.ua</a>
Year of study (year in which the study of the discipline is implemented)	6-H
Semester (semester in which the study of the discipline is implemented)	11-h - 12-h
Discipline / module type (compulsory / optional)	compulsory
Lecturers (names, surnames, scientific degrees and titles of teachers who teach the discipline, contact e-mail)	Professor Abragamovich M.O. <a href="mailto:marjana2003@ukr.net">marjana2003@ukr.net</a> Associate Professor Paraschuk B.M. <a href="mailto:pb02@ukr.net">pb02@ukr.net</a> , Associate Professor Schalko I.V. <a href="mailto:i.shalko@meta.ua">i.shalko@meta.ua</a> , Associate Professor Kit Z.M. <a href="mailto:zoryana.kit27@gmail.com">zoryana.kit27@gmail.com</a> Professor Gromnatska N.M., <a href="mailto:2romnatska@2mail.com">2romnatska@2mail.com</a> Associate Professor, MD Vergun A.R., <a href="mailto:plasi@mail@meta.ua">plasi@mail@meta.ua</a> Associate Professor, MD Sklyarova V.O. <a href="mailto:valisklyarova@hotmail.com">valisklyarova@hotmail.com</a>
Erasmus yes/no (availability of the discipline for students within the Erasmus + program)	
Person responsible for the syllabus (person to whom comments on the syllabus should be provided, contact email)	headmaster associate professor Paraschuk B.M <a href="mailto:pb02@ukr.net">pb02@ukr.net</a> ,
Total number of ECTS credits	3,5
Number of hours (lectures / practical classes / independent students' work)	105 hours (practical classes - 52, independent students' work - 53)
Course language	English
Consultation information	Consultations are held in accordance with the schedule of consultations approved by the head of the department

Address, telephone and rules of operation of the clinical base, office.. (if necessary)

2. Short abstract to the course

The main purpose of the discipline "General Practice - Family Medicine" - students mastering the basics of knowledge about the organization of medical care on the basis of family medicine, the basic principles of medical care in outpatient settings, preparation of the necessary medical documentation. During the cycle, students get acquainted with the organization of medical care by family doctors and specialists in outpatient clinics and at home, which is the primary link in providing medical care to the population.

---

### 3. Aim and objectives of the course

---

#### 1. The purpose of the study "General practice - family medicine" as an academic discipline

lays the foundations of knowledge about the organization of medical care on the basis of family medicine; is based on acquainting students with the functional responsibilities of family doctors, pediatricians, surgeons and obstetricians and gynecologists in the clinic; studies the structure of the outpatient clinic and its individual departments; provides an opportunity to gain practical experience in certain areas of future professional activity: outpatient reception of sick and healthy adults and children; early diagnosis of various diseases; dynamic screening of healthy and sick population; treatment of patients at home, in the day and home hospital of centralized and decentralized types; providing emergency care to patients at the prehospital stage; rehabilitation of the sick and disabled with extensive use of all rehabilitation measures; resolving issues of examination of temporary and permanent disability; selection of patients for sanatorium treatment; provides knowledge about keeping medical records by a doctor of the relevant specialty and a family doctor; work planning, accounting and analysis of morbidity and efficiency of the doctor;

2. **Learning goals:** Determining the basic principles of providing medical care on the basis of family medicine. Study of the basic forms of work and responsibilities of family doctors. Study of epidemiology, risk factors, possibilities of prevention and early diagnosis of the main most common diseases of internal organs. Study of the organization of medical care for children, the work of obstetrics and gynecology and surgery in outpatient settings. Acquaintance with the relevant documentation: ambulatory card, certificate of unfitness for work, statistical coupon, referral to MSEC, screening cards for healthy and sick adults and children

3. Competences and learning outcomes, the formation of which provides the study of the discipline (general and special competencies)..

#### *General:*

1. ability to abstract thinking, analysis and synthesis.
2. ability to apply knowledge in practical situations.
3. knowledge and understanding of the subject area and understanding of professional activity.
4. ability to conduct research at the appropriate level.
5. ability to learn and acquire modern knowledge.
6. Ability to identify, pose and solve problems.

#### *Special (professional, subject):*

##### To know:

1. Basic principles of providing medical care on the basis of family medicine.
2. Definition of the main forms, of work and responsibilities of family doctors.
3. Epidemiology, risk factors, possibilities of prevention and early diagnosis of the main most common diseases of internal organs.
4. Organization of medical care for children, the work of obstetrics and gynecology and surgery in outpatient settings.
5. Maintenance of documentation: ambulatory card, certificate of unfitness for work, statistical coupon, referral to MSEC, screening cards for healthy and sick adults and children.

##### *Be able to*

1. Solve medical and social problems of the family.
  2. Conduct dynamic monitoring of healthy and sick population.
  3. Determine the criteria for assessing the viability, effectiveness, relevance of screening programs.
  4. Develop programs of a plan of step-by-step preventive measures to improve the health of the family.
  5. Prescribe and interpret methods of laboratory, instrumental, functional diagnosis of diseases used in the family doctor's outpatient clinic.
  6. Determine the methods of primary and secondary prevention.
  7. Assess the prevalence of risk factors as a first step in developing preventive measures.
  8. Carry out prevention of chronic non-communicable diseases and promotion of a healthy lifestyle.
  9. Analyze the criteria of disability groups.
  10. Analyze methods for detecting disorders in diseases of internal organs and systems.
  11. Interpret the indicators of clinical and biochemical studies of blood, urine, feces and instrumental methods of examination of internal organs and systems.
  12. Principles of treatment of the most common diseases among the population in outpatient settings.
  13. Organization of medical care for children, obstetric and gynecological and surgical services in outpatient settings.
-

- Autonomy and responsibility:
1. Conducting outpatient reception of patients and healthy people.
  2. Treatment of patients at home and in the day hospital of the clinic, providing them with emergency care.
  3. Early diagnosis of various diseases using all available in the clinic methods of examination.
  4. Dynamic monitoring of the population in order to identify risk factors for various diseases and their prevention.
  5. Rehabilitation of patients with widespread use of all rehabilitation measures.
  6. Resolving issues of examination of permanent disability and determining the degree of disability.
  7. Organization of ITU work.
  8. Keeping medical records by a doctor of the relevant specialty.
  9. Work planning, accounting and analysis of morbidity and efficiency of the doctor's work.
  10. Promotion of sanitary and hygienic knowledge and principles of a healthy lifestyle among the adult population and children.

4. Prerequisites of the course

It is based on the study by students of disciplines: internal medicine, infectious diseases, epidemiology, pediatrics, endocrinology, neurology, oncology, surgery, ophthalmology, otolaryngology, dermatology, clinical immunology and pharmacology, resuscitation, social medicine and health care, hygiene and ecology, biostatistics, computer science, ethics and deontology and other morphological disciplines and integrates with them

5. Program learning outcomes

List of learning outcomes

Learning outcome code	The content of the learning outcome	Reference to the competency matrix code
<i>The code is generated when filling in the syllabus (category: Kn- knowledge, Sk- skills, K- competence, AR - autonomy and responsibility)</i>	<i>Learning outcomes determine that the student must know, understand and be able to perform, after completing the discipline. Learning outcomes follow from the set learning goals. To enroll in the discipline, it is necessary to confirm the achievement of each learning outcome.</i>	Symbol of the Code of the Program learning outcome in the Standard of higher education
<i>Kn-1</i>	Main principles of providing medical care on the basis of family medicine	<i>P - 23</i>
<i>Kn-2</i>	Definition of the main forms, of work and responsibilities of family doctors.	<i>P - 2, 3, 23</i>

*It is necessary to present the system of organization of classes, the use of interactive methods, educational technologies used for the transfer and acquisition of knowledge, skills and abilities.*

### 8. Verification of learning outcomes

#### **Current control**

*is carried out during training sessions and aims to check the understanding of students of educational material (it is necessary to describe the forms of current control during training sessions). Forms of assessment of current educational activities should be standardized and include control of theoretical and practical training. The final grade for the current academic activity is given on a 4-point (national) scale*

Learning outcome code Method of	Studies type Code	verifying learning outcomes	Enrollment criteria
<i>Kn - 1-5, Sk -1-13, K - 1-2, AR - 1-11</i> Attending practical classes. Execution of written tasks on the topic (test tasks, questions for self-control, tasks).	<i>P- 1-9, ISW- 1-4</i>	Writing draft procedural documents. Participation in discussions, discussion of issues submitted for independent study For enrollment study of the discipline is necessary: • full compliance with the	requirements of the curriculum; • correct solution of tasks both during classroom work and those that offered for independent study
General assessment system Assessment scales	Підсумковий контроль		
Terms of admission to final control	Participation in the work during the semester / differentiated test - 60% / 40% <u>on a 200-point scale</u> traditional 4-point scale, multi-point (200-point) scale, ECTS rating scale		
Type of final control examination	Methods of conducting final control	Enrollment criteria	
	All topics submitted for current control must be credited. Grades from the 4-point scale are converted into scores on a multi-point (200-point) scale in accordance with the Regulation "Criteria, rules and procedures for evaluating the results of students' learning activities"	<i>The maximum number of points is 200. The minimum number of points is 120</i>	
	Criteria for assessing the exam / differentiated test		

***The maximum number of points that a student can score for the current academic activity to allow differentiated credit is 120 points.***

***The minimum number of points that a student must score for the current academic activity for admission to the differentiated test is 72 points.***

Criteria for assessing the objective structured practical (clinical) exam / Complex of practice \_\_\_\_\_ oriented exam of the Master's thesis \_\_\_\_\_

9. Course policy \_\_\_\_\_

*Indicates the policies of academic integrity, the specific policies of the program that are relevant to the course*

Academic Integrity: Students' work is expected to be their original research or reasoning. Lack of references to sources used, fabrication of sources, write-offs, interference in the work of other students are, but are not limited, examples of possible academic dishonesty. Detection of signs of academic dishonesty in the student's work is the basis for its non-enrollment by the teacher, regardless of the extent of plagiarism or deception. Sources of training: the source base can be provided by the teacher exclusively for educational purposes without the right to transfer it to third parties. Students are encouraged to use other literature that is not on the recommended list \_\_\_\_\_

10. Literature \_\_\_\_\_

Mandatory

1. FAMILY MEDICINE: in 3 books / Edited by O.M. Hyrina, L.M. Pasiyeshvili. - Kyiv: AUS Medicine Publishing, 2016.
2. TEXTBOOK OF GENERAL PRACTICE: Third edition / Edited by Anne Stephenson. - London: CRC press, 2013.
- 3 TEXTBOOK OF FAMILY MEDICINE: Third edition / Edited by I.R. McWhinney, T. Freeman. - New York, USA: Oxford University Press, 2013.
4. THE MERCK MANUAL of DIAGNOSIS and THERAPY: Nineteenth edition / Edited by K.A.G. Lane. - West Point, NJ, USA: Merck, Sharpe and Dohme, 2011.

11. Equipment, material and technical support and software of the discipline / course  
Tables, diagrams, models, slide projector, multimedia projector, distance learning platform Misa

12. Additional Information

*All other information important for the student, which is not included in the standard description, for example, contact details of the person responsible for the educational process at the department, information about the scientific circle of the department, information about routes, information about the need to equip themselves with health and safety; information about the place of classes; links to website / department pages, etc.*
