

Теми контрольних робіт для 1 курсу фармацевтичного факультету (заочна форма навчання) з дисципліни «Іноземна мова за професійним спрямуванням»)

1. Alcohols and ethers. Influenza.
2. The organic acids and their esters. Poliomyelitis
3. Amines and other organic compounds. Bronchial asthma
4. Amino acids and proteins. Rheumatic heart disease.
5. Ionization. Cholelithiasis.
6. Acids. Pyelitis
7. Valence in terms of electron theory. Diabetes mellitus
8. Hydrogen—ion concentration (ph). The ph scale. Pernicious anaemia
9. Enzymes. Rheumatic fever
10. Bases. Infantile eczema
11. Salts. Trachoma
12. Introduction. Sympathetic ophthalmia
13. Oxygen. Acute tonsillitis
14. Hydrogen. Otitis media (acute suppurative)
15. Water. Rachitis (rickets)
16. Nitrogen. The atmosphere. Meningitis.
17. Chemistry. Antibiotics. Penicillin
18. Proteins and amino acids. Sulphonamides.
19. Acids. Radioiodine in the diagnosis of thyroid disease.
20. Properties of salts. Radiant energy in ophthalmology
21. Properties of water. Chorea.
22. Organic acids. Diabetes insipidus.
23. Minerals. Angina pectoris.
24. Purification of water. Diseases of the respiratory system.
