

TESTS TO THEME n 1- Variant 1

(second semester) - "Not infected and infected wounds. Healing by primary and secondary intention. Principles of medical tactics"

1. Healing by secondary intention is characteristic for wounds:
 - a) Aseptic
 - b) After primary surgical processing
 - c) Infected (contaminated)
 - d) Fresh
 - e) Superficial

Choose correct answer

2. What kind of the wounds accompanied by severe bleeding ?
 - a) chopped
 - b) bruised
 - c) lacerated
 - d) bitten
 - e) cut
3. The most difficult complication of the bitten wounds is:
 - a) bleeding
 - b) malaria
 - c) fury (rabies)
 - d) osteomyelitis
 - e) viral hepatitis

Test of the highest degree of difficulty

4. What wound heals faster than other ?
 - a) With red large granular granulations
 - b) With crimson small - sized granular granulations
 - c) With pale - pink large granular granulations
 - d) With "glasslike" granulations
 - e) With hypergranulations

Choose correct answer

5. Gaping of the wound (hiatus) [its divergence of edges] is stipulated by ?
 - a) Regeneration of the tissues
 - b) Hydration of the tissues
 - c) Elasticity of the tissues
 - d) Dehydration of the tissues
 - e) Reductioning of the tissues

Choose correct answer

TESTS TO THEME n 1- Variant 2

(second semester) - "Not infected and infected wounds. Healing by primary and secondary intention. Principles of medical tactics"

1. What kind of the wounds accompanied by severe bleeding ?
 - a) chopped
 - b) bruised
 - c) lacerated
 - d) bitten
 - e) cut
2. The most difficult complication of the bitten wounds is:
 - a) bleeding
 - b) malaria
 - c) fury (rabies)
 - d) osteomyelitis
 - e) viral hepatitis

Test of the highest degree of difficulty

3. What wound heals faster than other ?
 - a) With red large granular granulations
 - b) With crimson small - sized granular granulations
 - c) With pale - pink large granular granulations
 - d) With "glasslike" granulations
 - e) With hypergranulations

Choose correct answer

4. Gaping of the wound (hiatus) [its divergence of edges] is stipulated by ?
 - a) Regeneration of the tissues
 - b) Hydration of the tissues
 - c) Elasticity of the tissues
 - d) Dehydration of the tissues
 - e) Reductioning of the tissues

Choose correct answer

5. Healing by secondary intention is characteristic for wounds:
 - a) Aseptic
 - b) After primary surgical processing
 - c) Infected (contaminated)
 - d) Fresh
 - e) Superficial

Choose correct answer

TESTS TO THEME n 1- Variant 3

(second semester) - "Not infected and infected wounds. Healing by primary and secondary intention. Principles of medical tactics"

1. Healing by secondary intention is characteristic for wounds:
- a) Aseptic
 - b) After primary surgical processing
 - c) Infected (contaminated)
 - d) Fresh
 - e) Superficial

Choose correct answer

2. What kind of the wounds accompanied by severe bleeding ?
- a) chopped
 - b) bruised
 - c) lacerated
 - d) bitten
 - e) cut

Test of the highest degree of difficulty

3. What wound heals faster than other ?
- a) With red large granular granulations
 - b) With crimson small - sized granular granulations
 - c) With pale - pink large granular granulations
 - d) With "glasslike" granulations
 - e) With hypergranulations

Choose correct answer

4. Gaping of the wound (hiatus) [its divergence of edges] is stipulated by ?
- a) Regeneration of the tissues
 - b) Hydration of the tissues
 - c) Elasticity of the tissues
 - d) Dehydration of the tissues
 - e) Reductioning of the tissues

Choose correct answer

5. The most difficult complication of the bitten wounds is:
- a) bleeding
 - b) malaria
 - c) fury (rabies)
 - d) osteomyelitis
 - e) viral hepatitis

TESTS TO THEME n 1- Variant 5

(second semester) - "Not infected and infected wounds. Healing by primary and secondary intention. Principles of medical tactics"

1. Healing by secondary intention is characteristic for wounds:
- a) Aseptic
 - b) After primary surgical processing
 - c) Infected (contaminated)
 - d) Fresh
 - e) Superficial

Choose correct answer

2. The most difficult complication of the bitten wounds is:
- a) bleeding
 - b) malaria
 - c) fury (rabies)
 - d) osteomyelitis
 - e) viral hepatitis

Test of the highest degree of difficulty

3. What wound heals faster than other ?
- a) With red large granular granulations
 - b) With crimson small - sized granular granulations
 - c) With pale - pink large granular granulations
 - d) With "glasslike" granulations
 - e) With hypergranulations

Choose correct answer

4. Gaping of the wound (hiatus) [its divergence of edges] is stipulated by ?
- a) Regeneration of the tissues
 - b) Hydration of the tissues
 - c) Elasticity of the tissues
 - d) Dehydration of the tissues
 - e) Reductioning of the tissues

Choose correct answer

5. What kind of the wounds accompanied by severe bleeding ?
- a) chopped
 - b) bruised
 - c) lacerated
 - d) bitten
 - e) cut

TESTS TO THEME n 1- Variant 4

(second semester) - "Not infected and infected wounds. Healing by primary and secondary intention. Principles of medical tactics"

1. What kind of the wounds accompanied by severe bleeding ?
 - a) chopped
 - b) bruised
 - c) lacerated
 - d) bitten
 - e) cut
2. The most difficult complication of the bitten wounds is:
 - a) bleeding
 - b) malaria
 - c) fury (rabies)
 - d) osteomyelitis
 - e) viral hepatitis

Test of the highest degree of difficulty

3. What wound heals faster than other ?
 - a) With red large granular granulations
 - b) With crimson small - sized granular granulations
 - c) With pale - pink large granular granulations
 - d) With "glasslike" granulations
 - e) With hypergranulations

Choose correct answer

4. Healing by secondary intention is characteristic for wounds:
 - a) Aseptic
 - b) After primary surgical processing
 - c) Infected (contaminated)
 - d) Fresh
 - e) Superficial

Choose correct answer

5. Gaping of the wound (hiatus) [its divergence of edges] is stipulated by ?
 - a) Regeneration of the tissues
 - b) Hydration of the tissues
 - c) Elasticity of the tissues
 - d) Dehydration of the tissues
 - e) Reductioning of the tissues

Choose correct answer

TESTS TO THEME n 15- V6

(first semester) - "wounds"

1. What is Latin equivalent to the term "wound" ?
 - a) Valvulus
 - b) Vabices
 - c) Vulnus
 - d) Ruber
 - e) Ruptura
2. What kind of the wound accompanied by severe bleeding ?
 - a) Chopped
 - b) Bruised
 - c) Lacerated
 - d) Bitten
 - e) Incised
3. Healing of the wound by primary intension is possible at all indicated circumstances, excepting:
 - a) Full and dense contact of the tissues
 - b) Absence of infection in the wound
 - c) Preservation of viability of the wound edges
 - d) Availability of hematoma
 - e) Absence of the foreign bodies and necrosis
 - f) Violations of the blood microcirculation

Choose correct answer

4. What factors determine the pain intensity in the wound ?
 - a) Condition of the cardio – vessel system
 - b) Amount of the nervous terminations in area of the wound
 - c) Condition of endocrine system
 - d) Sharpness of the damaging agent
 - e) Nervous and mental condition

Choose correct combination of answers

5. What from the indicated parameters characterize I phase (hydration) of the wound healing?
 - 1) Increase of osmotic pressure
 - 2) Alkalinization of the tissues
 - 3) Amplification of phagocytosis
 - 4) Decrease (reduction) of metabolism
 - 5) Increase o metabolism
 - 6) Acidosis of the tissues
 - 7) Depressing of phagocytosis
 - 8) Decreasing of osmotic pressure

Choose correct combination of answers

A) 1, 3, 4, 7 B) 1, 2, 5,7 C) 2,3,5,8 D) 1, 3, 5, 6 E) 2, 4, 6, 8.

TESTS TO THEME n 15- V7

(first semester) - "wounds"

1. What kind of the wound accompanied by severe bleeding ?
 - a) Chopped
 - b) Bruised
 - c) Lacerated
 - d) Bitten
 - e) Incised
2. Healing of the wound by primary intension is possible at all indicated circumstances, excepting:
 - a) Full and dense contact of the tissues
 - b) Absence of infection in the wound
 - c) Preservation of viability of the wound edges
 - d) Availability of hematoma
 - e) Absence of the foreign bodies and necrosis
 - f) Violations of the blood microcirculation

Choose correct answer

3. What factors determine the pain intensity in the wound ?
 - a) Condition of the cardio – vessel system
 - b) Amount of the nervous terminations in area of the wound
 - c) Condition of endocrine system
 - d) Sharpness of the damaging agent
 - e) Nervous and mental condition

Choose correct combination of answers

4. What from the indicated parameters characterize I phase (hydration) of the wound healing?
 - 1) Increase of osmotic pressure
 - 2) Alkalinization of the tissues
 - 3) Amplification of phagocytosis
 - 4) Decrease (reduction) of metabolism
 - 5) Increase o metabolism
 - 6) Acidosis of the tissues
 - 7) Depressing of phagocytosis
 - 8) Decreasing of osmotic pressure

Choose correct combination of answers

A) 1, 3, 4, 7 B) 1, 2, 5,7 C) 2,3,5,8 D) 1, 3, 5, 6 E) 2, 4, 6, 8.

5. What is Latin equivalent to the term "wound" ?
 - a) Valvulus
 - b) Vabices
 - c) Vulnus
 - d) Ruber
 - e) Ruptura

TESTS TO THEME n 15- V8

(first semester) - "wounds"

1. Healing of the wound by primary intension is possible at all indicated circumstances, excepting:
- a) Full and dense contact of the tissues
 - b) Absence of infection in the wound
 - c) Preservation of viability of the wound edges
 - d) Availability of hematoma
 - e) Absence of the foreign bodies and necrosis
 - f) Violations of the blood microcirculation

Choose correct answer

2. What factors determine the pain intensity in the wound ?
- a) Condition of the cardio – vessel system
 - b) Amount of the nervous terminations in area of the wound
 - c) Condition of endocrine system
 - d) Sharpness of the damaging agent
 - e) Nervous and mental condition

Choose correct combination of answers

3. What from the indicated parameters characterize I phase (hydration) of the wound healing?
- 1) Increase of osmotic pressure
 - 2) Alkalinization of the tissues
 - 3) Amplification of phagocytosis
 - 4) Decrease (reduction) of metabolism
 - 5) Increase o metabolism
 - 6) Acidosis of the tissues
 - 7) Depressing of phagocytosis
 - 8) Decreasing of osmotic pressure

Choose correct combination of answers

A) 1, 3, 4, 7 B) 1, 2, 5,7 C) 2,3,5,8 D) 1, 3, 5, 6 E) 2, 4, 6, 8.

4. What is Latin equivalent to the term "wound" ?
- a) Valvulus
 - b) Vabices
 - c) Vulnus
 - d) Ruber
 - e) Ruptura
5. What kind of the wound accompanied by severe bleeding ?
- a) Chopped
 - b) Bruised
 - c) Lacerated
 - d) Bitten
 - e) Incised

TESTS TO THEME n 15- V9

(first semester) - "wounds"

1. What factors determine the pain intensity in the wound ?
 - a) Condition of the cardio – vessel system
 - b) Amount of the nervous terminations in area of the wound
 - c) Condition of endocrine system
 - d) Sharpness of the damaging agent
 - e) Nervous and mental condition

Choose correct combination of answers

2. What from the indicated parameters characterize I phase (hydration) of the wound healing?
 - 1) Increase of osmotic pressure
 - 2) Alkalinization of the tissues
 - 3) Amplification of phagocytosis
 - 4) Decrease (reduction) of metabolism
 - 5) Increase of metabolism
 - 6) Acidosis of the tissues
 - 7) Depressing of phagocytosis
 - 8) Decreasing of osmotic pressure

Choose correct combination of answers

A) 1, 3, 4, 7 B) 1, 2, 5, 7 C) 2, 3, 5, 8 D) 1, 3, 5, 6 E) 2, 4, 6, 8.

3. What is Latin equivalent to the term "wound" ?
 - a) Valvulus
 - b) Vabices
 - c) Vulnus
 - d) Ruber
 - e) Ruptura
4. What kind of the wound accompanied by severe bleeding ?
 - a) Chopped
 - b) Bruised
 - c) Lacerated
 - d) Bitten
 - e) Incised
5. Healing of the wound by primary intension is possible at all indicated circumstances, excepting:
 - a) Full and dense contact of the tissues
 - b) Absence of infection in the wound
 - c) Preservation of viability of the wound edges
 - d) Availability of hematoma
 - e) Absence of the foreign bodies and necrosis
 - f) Violations of the blood microcirculation

Choose correct answer

TESTS TO THEME n 15- V10

(first semester) - "wounds"

1. What from the indicated parameters characterize I phase (hydration) of the wound healing?
- 1) Increase of osmotic pressure
 - 2) Alkalinization of the tissues
 - 3) Amplification of phagocytosis
 - 4) Decrease (reduction) of metabolism
 - 5) Increase of metabolism
 - 6) Acidosis of the tissues
 - 7) Depressing of phagocytosis
 - 8) Decreasing of osmotic pressure

Choose correct combination of answers

A) 1, 3, 4, 7 B) 1, 2, 5, 7 C) 2, 3, 5, 8 D) 1, 3, 5, 6 E) 2, 4, 6, 8.

2. What is Latin equivalent to the term "wound" ?
- a) Valvulus
 - b) Vabices
 - c) Vulnus
 - d) Ruber
 - e) Ruptura
3. What kind of the wound accompanied by severe bleeding ?
- a) Chopped
 - b) Bruised
 - c) Lacerated
 - d) Bitten
 - e) Incised
4. Healing of the wound by primary intension is possible at all indicated circumstances, excepting:
- a) Full and dense contact of the tissues
 - b) Absence of infection in the wound
 - c) Preservation of viability of the wound edges
 - d) Availability of hematoma
 - e) Absence of the foreign bodies and necrosis
 - f) Violations of the blood microcirculation

Choose correct answer

5. What factors determine the pain intensity in the wound ?
- a) Condition of the cardio – vessel system
 - b) Amount of the nervous terminations in area of the wound
 - c) Condition of endocrine system
 - d) Sharpness of the damaging agent
 - e) Nervous and mental condition

Choose correct combination of answers
