

Attachment № 1 to the option № 1

Затверджено на засіданні профільної методичної комісії з філологічних дисциплін

Протокол №..... від "....."20.....року.

Голова профільної методичної комісії доц. Смольська Л.Ю.
(підпис) (прізвище, ініціали)

OPTION 1

1. The 3rd declination nouns are:
a) spina, cornu, corpus b) columna, os, canalis c) corpus, basis, tuberositas d) dens, arcus, dosis
2. The adjective **sinister, tra, um** means:
a) large b) oblique c) left d) right e) flat
3. 1st group adjectives are:
a) longus, anterior, palatinus b) vertebralis, dentalis, facialis c) thoracicus, dexter, rotundus d) par, dexter, latus
4. 2nd group adjectives are:
a) spurius, brevis, vertebralis b) biceps, lateralis, occipitalis c) acusticus, scapularis, inferior d) par, latus, longus
5. Choose the ending of the term **tuberculum musculi** ... (tubercle of muscle)
a) - us b) - ae c) - i d) - is e) - um
6. Which term is used in **Nom.Pl.**:
a) ligamenta transversa b) lamina profunda c) sulcus venosus d) ossis brevis
7. Choose the term formed by **Nn An**:
a) lamina dentis b) os zygomaticum c) os cranii d) tuberculum ossis
8. Choose the term formed by **Nn Ng**:
a) ala major b) apex ossis c) collum anatomicum d) os sinistrum
9. The noun **arcus, us m** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 1st declination
10. The noun **corpus, oris n** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 1st declination
11. The noun **facies, ei f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 1st declination
12. The gender of the term **cornu minus**:
a) masculine b) feminine c) neutral
13. The gender of the term **canalis vertebralis**:
a) masculine b) feminine c) neutral
14. The gender of the term **extremitas superior**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **crest of tubercle** is:
a) crista tuberculi b) crista tuberculum c) crista tuberculorum d) crista tubercula
16. The correct translation of the term **lamina of arch** is:
a) lamina arcus b) lamina arcuum c) laminae arcus d) laminarum arcus
17. The correct translation of the term **body of breastbone** is:
a) corpus sterni b) corpus sternum c) corporis sternum d) corporis sternum
18. The correct translation of the term **tubercle of muscle** is:
a) tuberculum musculum b) tuberculis musculi c) tuberculum musculi d) tuberculum musculis

19. The correct translation of the term **incisure of scapula** is:
 a) incisura scapula b) incisura scapulae c) incisurae scapulae d) incisurarum scapularum
20. The correct translation of the term **temporal bone** is:
 a) os temporalis b) ossis temporalis c) os temporale d) ossa temporalia
21. The correct translation of the term **compound articulation** is:
 a) articulatio compositus b) articulatio composita c) articulatio compositum d) articulationis compositae
22. The correct translation of the term **true rib** is:
 a) costa verus b) costa vera c) costa verum d) costae verae
23. The correct translation of the term **squamous part** is:
 a) partis spongiosa b) pars squamosa c) partes squamosae d) pars squamosus
24. The correct translation of the term **superior process** is:
 a) processus superius b) processus superior c) processus superioris d) processus superiori
25. The correct translation of the term **superior foramen** is:
 a) foramen superior b) foramen superioris c) foramen superius d) foramina superiora
26. The genitive singular form of the term **sutura squamosa** is:
 a) suturis squamosis b) suturis squamosae c) suturae squamosae d) suturarum squamosarum
27. The genitive singular form of the term **processus spinosus** is:
 a) processus spinosus b) processus spinosi c) processi spinosi d) processui spinoso
28. The genitive singular form of the term **facies articularis** is:
 a) facies articularis b) faciei articularis c) faciem articulare m d) facies articulares
29. The genitive singular form of the term **tuberositas deltoidea** is:
 a) tuberositatem deltoideam b) tuberositatis deltoideae c) tuberositates deltoideae d) tuberositatum deltoidearum
30. The genitive singular form of the term **caput femoris** is:
 a) capitis femoris b) caput femorale c) capita femoris d) capite femoris
31. The genitive singular form of the term **arcus vertebrae** is:
 a) arcus vertebralis b) arcui vertebrae c) arcubus vertebrae d) arcus vertebrae
32. The genitive singular form of the term **pulmo dexter** is:
 a) pulmonum dextrorum b) pulmonis dextri c) pulmones dextri d) pulmone m dextrum
33. Add the ending: **incisura cardiac... pulmonis** (cardiac incisure of lung)
 a) -i b) -ae c) -um d) -a e) -is
34. Add the ending: **foramen alveolar... posterior** (posterior alveolar foramen)
 a) -i b) -e c) -um d) -us e) -is
35. Add the ending: **processus articular... superior** (superior articular process)
 a) -i b) -ae c) -um d) -us e) -is

Attachment № 2 to the option № 1

Provide Nom. and Gen. of Sing. for following phrases:

36. collum, in – anatomicus, a, um
37. foramen, inis n – superior, ius
38. costa, ae f – verus, a, um
39. meatus, us m – acusticus, a, um
40. os, ossis n – occipitalis, e

Attachment № 1 to the option № 2

OPTION 2

1. The **3rd** declination nouns are:
a) fossa, cornu, processus b) meatus, arcus, musculus c) margo, basis, tuberositas d) facies, genu, rete
2. Adjective **verus, a, um** means:
a) various b) big c) mucous d) true e) great
3. **2nd** group adjectives are:
a) verus, articularis, vertebralis; b) facialis, lateralis, occipitalis; c) acusticus, scapularis, inferior d) par, verus, cavus
4. **1st** group adjectives are:
a) thoracicus, antierius, planus b) simplex, dentalis, biceps c) longus, dexter, mucosus d) saluber, sinister, nervosus
5. Choose the ending of the term **basis mandibul**...: (base of jaw)
a) - us b) - ae c) - i d) - is e) - a
6. Which term is used in **Nom.Pl.**:
a) musculo transverso b) canalibus tympanicis c) sulci palatini d) tubercis ischiadici.
7. Choose the term formed by **Nn An**:
a) arcus vertebrae b) os palatinum c) collum scapulae d) corpus sterni
8. Choose the term formed by **Nn Ng**:
a) ala minor b) apex pulmonis c) collum anatomicum d) lamina medialis
9. The noun **ductus, us m** belongs to:
a) 1st declination b) 3rd declination c) 4th declination d) 2nd declination
10. The noun **tuberositas, atis f** belongs to:
a) 4 declination b) 3rd declination c) 5th declination d) 2nd declination
11. The noun **costa, ae f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 1st declination
12. The gender of the term **ligamentum profundum**:
a) masculine b) feminine c) neutral
13. The gender of the term **arcus anterior**:
a) masculine b) feminine c) neutral
14. The gender of the term **cartilago costalis**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **tuberosity of muscle** is:
a) tuberositas musculi b) tuberositatis musculi c) tuberositates musculi d) tuberositas musculorum
16. The correct translation of the term **apex of tongue** is:
a) apices linguae b) apex linguae c) apicis linguae d) apicum linguarum
17. The correct translation of the term **neck of ribs** is:
a) colla costae b) colli costae c) collum costarum d) collum costae
18. The correct translation of the term **angle of muscle** is:
a) anguli musculi b) angulus musculorum c) anguli musculorum d) angulus musculi

19. The correct translation of the term **lamina of tooth** is:
 a) lamina dentis b) lamina dentium c) laminae dentis d) laminae dentium
20. The correct translation of the term **occipital artery** is:
 a) arteria occipitalia b) arteriae occipitalis c) arteria occipitale d) arteria occipitalis
21. The correct translation of the term **oral cavity** is:
 a) cavitas ossis b) cavitas oris c) cavitatis oris d) cavitas os
22. The correct translation of the term **lateral cartilage** is:
 a) cartilago lateralis b) cartilagin is lateralis c) cartilago laterale d) cartilagin is laterale
23. The correct translation of the term **internal base** is:
 a) basis internus b) basis interna c) basis internum d) basis internae
24. The correct translation of the term **parietal bone** is:
 a) os parietale b) ossa parietalia c) ossa parietale d) os parietalis
25. The correct translation of the term **superior foramen** is:
 a) foramen superior b) foramen superioris c) foramen superius d) foraminis superioris
26. The genitive singular form of the term **vena temporalis** is:
 a) venae temporale b) venae temporalis c) venarum temporalium d) venae temporales
27. The genitive singular form of the term **processus spinosus** is:
 a) processus spinosus b) processi spinosi c) processus spinosi d) processus spinosorum
28. The genitive singular form of the term **tuberculum occipitale** is:
 a) tuberculi occipitale b) tuberculi occipitalia c) tuberculi occipitales d) tuberculi occipitalis
29. The genitive singular form of the term **plica longitudinalis** is:
 a) plicae longitudinalis b) plicae longitudinales c) plicae longitudinali d) plicae longitudinales
30. The genitive singular form of the term **fissura ligamenti** is:
 a) fissura ligamenta b) fissura ligamentum c) fissurae ligamenti d) fissurae ligamentis
31. The genitive singular form of the term **cartilago nasi** is:
 a) cartilagin is nasis b) cartilagin is nasus c) cartilago nasis d) cartilagin is nasi
32. The genitive singular form of the term **dens serotinus** is:
 a) dentis serotinis b) dentis serotini c) dentis serotinus d) dentis serotinae
33. Add the ending: **cornu sacral... dextrum** (left sacral horn)
 a) -i b) -e c) -um d) -us e) -is
34. Add the ending: **apex radic... dentis** (apex of root of tooth)
 a) -i b) -ae c) -um d) -us e) -is
35. Add the ending: **facies pelvin... ossis** (pelvic surface of bone)
 a) -i b) -a c) -um d) -us e) -is

Attachment № 2 to the option № 2

Provide Nom. and Gen. of Sing. for following phrases:

36. ligamentum, in – abdominalis, e
37. foramen, in is n – nutricius, a, um
38. processus, us m – articularis, e
39. pars, partis f – squamosus, a, um
40. os, ossis n – longus, a, um

Attachment № 1 to the option № 3

Затверджено на засіданні профільної методичної комісії з філологічних дисциплін

Протокол №..... від "....."20.....року.

OPTION 3

1. The 3rd declination nouns are:
a) cavitas, homo, dens b) vas, species, angulus c) pars, basis, scapula d) cornu, ramus, dies
2. Adjective **profundus, a, um** means:
a) wide b) round c) deep d) professional e) great
3. 2nd group adjectives are:
a) acutus, recens, biceps b) triceps, basalis, major c) acusticus, cranialis, inferior d) centralis, longus, nutricius
4. 1st group adjectives are:
a) latus, medius, celer b) teres, opticus, sacer c) radialis, sternalis, lateralis d) spinosus, verus, dextre
5. Choose the ending of the term **os faci** ...: (bone of face)
a) -us b) -ae c) -i d) -is e) -ei
6. Which term is used in **Nom.Pl.**:
a) vertebrae coccygeae b) collo anatomico c) alae majoris d) pedem planum
7. Choose the term formed by **Nn An**:
a) cavitas thoracis b) lamina dentis c) os sacrum d) apex linguae
8. Choose the term formed by **Nn Ng**:
a) basis ossis b) ala minor c) sulcus caroticus d) foramen spinosum
9. The noun **meatus, us m** belongs to:
a) 1st declination b) 4th declination c) 3rd declination d) 5th declination
10. The noun **cavitas, atis f** belongs to:
a) 2nd declination b) 4th declination c) 3rd declination d) 1st declination
11. The noun **caries, ei f** belongs to:
a) 2nd declination b) 5th declination c) 3rd declination d) 1st declination
12. The gender of the term **foramen spinosum**:
a) masculine b) feminine c) neutral
13. The gender of the term **facies costalis**:
a) masculine b) feminine c) neutral
14. The gender of the term **sinus posterior**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **crest of tubercle** is:
a) crista tuberculum b) crista tuberculi c) cristae tuberculum d) cristae tuberculi
16. The correct translation of the term **incisure of scapula** is:
a) incisura scapulae b) incisura scapula c) incisurae scapulae d) incisurae scapula
17. The correct translation of the term **process of bone** is:
a) processus ossis b) processuum ossium c) processi ossis d) processus os
18. The correct translation of the term **cartilage of nose** is:
a) cartilaginis nasus b) cartilago nasi c) cartilaginis nasi d) cartilago nasus
19. The correct translation of the term **lamina of arch** is:

- a) laminae arcus b) lamina arcu c) lamina arcus d) arcus lamina
20. The correct translation of the term **temporal bone** is:
 a) os temporalis b) ossis temporalis c) os temporale d) ossa temporalia
21. The correct translation of the term **internal base** is:
 a) basis internis b) bases internae c) basis interna d) basis internae
22. The correct translation of the term **true rib** is:
 a) costa verus b) costa vera c) costa verum d) costae verae
23. The correct translation of the term **lymphatic vessel** is:
 a) vasa lymphatica b) vas lymphatica c) vas lymphaticus d) vas lymphaticum
24. The correct translation of the term **articular surface** is:
 a) faciei articularis b) facies articulare c) facies articulares d) facies articularis
25. The correct translation of the term **occipital protuberance** is:
 a) protruberantia occipitalis b) protruberantia occipitales c) protruberantia occipitalia d) protruberantia occopitale
26. The genitive singular form of the term **arteria maxillaris** is:
 a) arteriae maxillare b) arteriae maxillaris c) arterium maxillarium d) arteriae maxillares
27. The genitive singular form of the term **processus spinosus** is:
 a) processus spinosi b) processus spinosus c) processus spinosi d) processis spinosis
28. The genitive singular form of the term **vena labialis** is:
 a) venae labialis b) venae labiales c) vena labialia d) vena labialis
29. The genitive singular form of the term **nervus occipitalis** is:
 a) nervi occipitali b) nervi occipitalis c) nervus occipitalium d) nervus occipitali
30. The genitive singular form of the term **caput costae** is:
 a) capita costa b) capitis costa c) caput costae d) capitis costae
31. The genitive singular form of the term **margo lacrimalis** is:
 a) margini lacrimali b) marginis lacrimalis c) margina lacrimalia d) marginis lacrimali
32. The genitive singular form of the term **ren sinister** is:
 a) ren sinister b) renis sinistris c) renis sinistri d) ren sinistra
33. Add the ending: **tuberculum muscul... anterioris** (tubercle of anterior muscle)
 a) -i b) -ae c) -um d) -a e) -e
34. Add the ending: **foramen sacral... pelvinum** (sacral pelvic foramen)
 a) -i b) -ae c) -um d) -a e) -e
35. Add the ending: **incisura cardiac... pulmonis** (cardiac incisure of lung)
 a) -i b) -ae c) -um d) -a e) -e

Attachment № 2 to the option № 3

Provide Nom. and Gen. of Sing. for following phrases:

36. musculus, i m – anterior, ius
37. incisura, ae f – ischiadicus, a, um
38. margo, in is m – squamosus, a, um
39. ramus, i m – anterior, ius
40. ligamentum, i n – abdominalis, e

Attachment № 1 to the option № 4

Затверджено на засіданні профільної методичної комісії з філологічних дисциплін

Протокол №..... від "....."20.....року.

Голова профільної методичної комісії доц. Смольська Л.Ю.

OPTION 4

1. The **3rd** declination nouns are:
a) dolor, sternum, scapula b) digitus, pulmo, processus c) arteria, collum, facies d) pars, apex, radix
2. Adjective **dexter, tra, trum** means:
a) deteriorated b) compound c) simple d) right e) great
3. **2nd** group of adjectives are:
a) spurius, par, dorsalis b) simplex, brevis, frontalis c) acusticus, scapularis, inferior d) spinalis, cavus, internus
4. **1st** group of adjectives are:
a) latus, superior, osseus b) muscularis, costalis, facialis c) spurius, dexter, opticus d) liber, celer, posterior
5. Choose the ending of the term **sulcus arteri** ...: (grove of artery)
a) - us b) - ae c) - i d) - is e) -a
6. Which term is used in **Nom.Pl.**:
a) arteriae occipitales b) osse sacro c) facierum anteriorum d) dosibus minimis
7. Choose the term formed by **Nn An**:
a) lamina dentis b) os cranii c) os cranii d) costa spuria
8. Choose the term formed by **Nn Ng**:
a) arteria occipitalis b) sulcus costae c) meatus acusticus d) pars squamosa
9. The noun **caput, itis n** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 5th declination
10. The noun **processus, us m** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 5th declination
11. The noun **rabies, ei f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 1st declination
12. The gender of the term **ligamentum abdominale**:
a) masculine b) feminine c) neutral
13. The gender of the term **pulmo dexter**:
a) masculine b) feminine c) neutral
14. The gender of the term **pars lateralis**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **cavity of lung** is:
a) cavitas pulmo b) cavitatis pulmonis c) cavitas pulmonis d) cavitates pulmonis
16. The correct translation of the term **root of tooth** is:
a) radice dentis b) radix dentis c) radice dentium d) radices dentis
17. The correct translation of the term **angle of braestbone** is:
a) angulus sternorum b) angulus sterni c) anguli sternum d) anguli sterni
18. The correct translation of the term **apex of root** is:
a) apicis radice b) apex radix c) apex radice d) radix apicis
19. The correct translation of the term **incisure of lung** is:

- a) incisura pulmo b) incisura pulmonis c) incisurae pulmo d) incisurae pulmonis
20. The correct translation of the term **temporal bone** is:
a) os temporalis b) ossis temporalis c) os temporale d) ossa temporalia
21. The correct translation of the term **external ear** is:
a) auris externis b) auris externus c) auris externa d) auris externum
22. The correct translation of the term **left part** is:
a) pars sinister b) pars sinistra c) pars sinistrum d) pars sinistrae
23. The correct translation of the term **internal base** is:
a) basis internus b) basis interna c) basis internum d) basis internis
24. The correct translation of the term **yellow body** is:
a) corpus flavus b) corpus flava c) corpus flavum d) corporis flavi
25. The correct translation of the term **alveolar foramen** is:
a) foramen alveolare b) foramen alveolaris c) foramen alveolaria d) foraminis alveolaris
26. The Genetive Singular form of the term **cor bovinum** is:
a) cordis bovinis b) cordis bovini c) cordium bovinum d) cordis bovinus
27. The Genetive Singular form of the term **processus spinosus** is:
a) processus spinosus b) processus spinosi c) processi spinosi d) processuum spinosum
28. The Genetive Singular form of the term **cavitas profunda** is:
a) cavitas profundae b) cavitatis profundi c) cavitatis profundae d) cavitatis profundis
29. The Genetive Singular form of the term **ligamentum intercostale** is:
a) ligamenti intercostalae b) ligamenti intercostali c) ligamenti intercostalis d) ligamenti intercostale
30. The Genetive Singular form of the term **caput costae** is:
a) capitis costae b) capitis costa c) caput costa d) capita costa
31. The Genetive Singular form of the term **processus ossis** is:
a) processus ossis b) processi ossis c) processus ossa d) processi ossa
32. The Genetive Singular form of the term **vena labialis** is:
a) venae labialae b) venae labiali c) venae labialis d) venae labialia
33. Add the ending: **meatus nas... medius** (middle meatus of nose)
a) -i b) -ae c) -um d) -a e) -is
34. Add the ending: **recessus duodenal... inferior** (inferior duodenal recess)
a) -i b) -ae c) -um d) -a e) -is
35. Add the ending: **facies medial... dentis** (medieval surface of tooth)
a) -i b) -ae c) -um d) -a e) -is

Attachment № 2 to the option № 4

Provide Nom. and Gen. of Sing. for following phrases:

36. foramen, inis n – rotundus, a, um
37. musculus, i m – superior, ius
38. costa, ae f – sinister, tra, tru m
39. meatus, us m – acusticus, a, um
40. os, ossis n – parietalis, e

Attachment № 1 to the option № 5

Затверджено на засіданні профільної методичної комісії з філологічних дисциплін

Протокол №..... від "....."20.....року.

OPTION 5

- The 3rd declination nouns are:
a) cor, lamina, cranium b) pulmo, cartilago, articulatio c) abdomen, caput, arcus d) membrum, brachium, atrium
- Adjective **spurius, a, um** means:
a) spare b) left c) false d) right e) great
- 2nd group adjectives are:
a) vertebralis, medialis, anterior b) costalis, longus, biceps c) acusticus, inferior, asper d) ulnaris, proprius, latus
- 1st group adjectives are:
a) pubicus, inferius, planus b) sinister, osseus, latus c) venosus, teres, distalis d) magnus, coccygeus, sternalis
- Choose the ending of the term **angulus ventricul** ...: (angle of ventricle)
a) – i b) – ae c) – us d) – is e) – a
- Which term is used in **Nom.Pl.**:
a) cutem siccam b) septis osseis c) cartilagine costales d) retibus venosis
- Choose the term formed by **Nn An**:
a) arcus vertebrae b) apertura thoracis c) angulus sterni d) membrum inferius
- Choose the term formed by **Nn Ng**:
a) columna vertebralis b) spina scapulae c) sulcus palatinus d) arcus anterior
- The noun **genu, us n** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 5th declination
- The noun **apex, icis m** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 5th declination
- The noun **fides, ei f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 1st declination
- The gender of the term **facies anterior** is:
a) masculine b) feminine c) neutral
- The gender of the term **foramen nutricium** is:
a) masculine b) feminine c) neutral
- The gender of the term **margo occipitalis** is:
a) masculine b) feminine c) neutral
- The correct translation of the term **body of breastbone** is:
a) corpus sternus b) corpus sternum c) corpus sterni d) corporis sternum
- The correct translation of the term **crest of tubercle** is:
a) crista tuberculum b) cristae tuberculum c) crista tuberculus d) crista tuberculi
- The correct translation of the term **tubercle of muscle** is:
a) tuberculus musculus b) tuberculus musculi c) tuberculum musculi d) tuberculi musculus
- The correct translation of the term **lamina of arch** is:
a) lamina arcus b) lamina arcuum c) laminae arcus d) laminae arcuum
- The correct translation of the term **apex of lung** is:

- a) apicis pulmonis b) apex pulmonis c) apicis pulmonum d) apicis pulmone
20. The correct translation of the term **temporal bone** is:
a) os temporalis b) ossis temporalis c) os temporale d) ossis temporale
21. The correct translation of the term **small horn** is:
a) cornu minus b) cornus minus c) cornu minor d) cornu minoris
22. The correct translation of the term **occipital lobe** is:
a) lobus occipitale b) lobi occipitalis c) lobus occipitale d) lobus occipitalis
23. The correct translation of the term **lateral cartilage** is:
a) cartilago laterale b) cartilagin is lateralis c) cartilago lateralis d) cartilagin is laterale
24. The correct translation of the term **capillary vessel** is:
a) vas capillaris b) vasa capillaria c) vasis capillaris d) vas capillare
25. The correct translation of the term **superior foramen** is:
a) foramen superior b) foramen superioris c) foramen superius d) foraminis superioris
26. The Genitive Singular form of the term **fascia cervicalis** is:
a) fascia cervicalia b) fasciae cervicale c) fascia cervacale d) fasciae cervicalis
27. The Genitive Singular form of the term **processus spinosus** is:
a) processus spinosus b) processus spinosi c) processi spinosi d) processuum spinosum
28. The Genitive Singular form of the term **facies articularis** is:
a) facies articularis b) faciei articularis c) faciae articularis d) facie articulare
29. The Genitive Singular form of the term **tuberositas deltoidea** is:
a) tuberositatis deltoideae b) tuberositatis deltoidei c) tuberositatis deltoideus d) tuberositas deltoideus
30. The Genitive Singular form of the term **caput femoris** is:
a) caput femur b) capitis femorale c) caput femoris d) capitis femoris
31. The Genitive Singular form of the term **arcus vertebrae** is:
a) arcus vertebrae b) arci vertebrae c) arcus vertebri d) arcuum vertebrarum
32. The Genitive Singular form of the term **foramen parietale** is:
a) foramen parietalis b) foramen parietale c) foramina parietalia d) foraminis parietalis
33. Add the ending: **incisura pulmon... sinistri** (incisure of left lung)
a) -i b) -e c) -um d) -a e) -is
34. Add the ending: **rete articular... genus** (articular network of knee)
a) -i b) -e c) -um d) -a e) -is
35. Add the ending: **basis intern... cranii** (internal base of skull)
a) -i b) -e c) -um d) -a e) -is

Attachment № 2 to the option № 5

Provide Nom. and Gen. of Sing. for following phrases:

36. cornu, us n – major, ius
37. apertura, ae f – inferior, ius
38. sulcus, i m – palatinus, a, um
39. cartilago, inis f – costalis, e
40. os, ossis n – sacer, cra, crum

Attachment № 1 to the option № 6

Затверджено на засіданні профільної методичної комісії з філологічних дисциплін

Протокол №..... від "....."20.....року.

OPTION 6

1. The 3rd declination nouns are:
a) spina, cornu, corpus b) columna, os, canalis c) corpus, basis, tuberositas d) dens, arcus, dosis
2. The adjective **flavus, a, um** means:
a) large b) oblique c) white d) yellow e) flat
3. 1st group adjectives are:
a) longus, anterior, palatinus b) vertebralis, dentalis, facialis c) thoracicus, dexter, rotundus d) par, dexter, latus
4. 2nd group adjectives are:
a) spurius, brevis, vertebralis b) biceps, lateralis, occipitalis c) acusticus, scapularis, inferior d) par, latus, longus
5. Choose the ending of the term **angulus stern**... (angle of breastbone)
a) - us b) - ae c) - i d) - is e) - um
6. Which term is used in **Nom.Pl.**:
a) ligamenta transversa b) lamina profunda c) sulcis venosis d) ossis brevis
7. Choose the term formed by **Nn An**:
a) lamina dentis b) os zygomaticum c) os cranii d) tuberculum ossis
8. Choose the term formed by **Nn Ng**:
a) ala major b) apex ossis c) collum anatomicum d) os sinistrum
9. The noun **arcus, us m** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 1st declination
10. The noun **corpus, oris n** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 1st declination
11. The noun **facies, ei f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 1st declination
12. The gender of the term **cornu minus**:
a) masculine b) feminine c) neutral
13. The gender of the term **canalis vertebralis**:
a) masculine b) feminine c) neutral
14. The gender of the term **extremitas superior**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **crest of tubercle** is:
a) crista tuberculi b) crista tuberculum c) crista tuberculorum d) crista tubercula
16. The correct translation of the term **lamina of arch** is:
a) lamina arcus b) lamina arcuum c) laminae arcus d) laminarum arcus
17. The correct translation of the term **body of breastbone** is:
a) corpus sterni b) corpus sternum c) corporis sternum d) corporis sternum
18. The correct translation of the term **tubercle of muscle** is:
a) tuberculum musculus b) tuberculorum musculi c) tuberculum musculi d) tuberculum musculorum
19. The correct translation of the term **incisure of scapula** is:

- a) incisura scapula b) incisura scapulae c) incisurae scapulae d) incisurarum scapularum
20. The correct translation of the term **temporal bone** is:
a) os temporalis b) ossis temporalis c) os temporale d) ossa temporalia
21. The correct translation of the term **compound articulation** is:
a) articulatio compositus b) articulatio composita c) articulatio compositum d) articulationis compositae
22. The correct translation of the term **true rib** is:
a) costa verus b) costa vera c) costa verum d) costae verae
23. The correct translation of the term **squamous part** is:
a) partis spongiosa b) pars squamosa c) partes squamosae d) pars squamosus
24. The correct translation of the term **superior process** is:
a) processus superius b) processus superior c) processus superioris d) processus superiori
25. The correct translation of the term **superior foramen** is:
a) foramen superior b) foramen superioris c) foramen superius d) foramina superiora
26. The genitive form of the term **sutura squamosa** is:
a) suturis squamosis b) suturis squamosae c) suturae squamosae d) suturarum squamosarum
27. The genitive form of the term **processus spinosus** is:
a) processus spinosus b) processus spinosi c) processi spinosi d) processui spinoso
28. The genitive form of the term **facies articularis** is:
a) facies articularis b) faciei articularis c) faciem articulare m d) facies articulares
29. The Gen. Sing. of the term **tuberositas deltoidea** is:
a) tuberositatem deltoideam b) tuberositatis deltoideae c) tuberositates deltoideae d) tuberositatum deltoidearum
30. The genitive singular form of the term **caput femoris** is:
a) capitis femoris b) caput femorale c) capita femoris d) capite femoris
31. The genitive singular form of the term **arcus vertebrae** is:
a) arcus vertebralis b) arcui vertebrae c) arcubus vertebrae d) arcus vertebrae
32. The genitive singular form of the term **pulmo dexter** is:
a) pulmonum dextrorum b) pulmonis dextri c) pulmones dextri d) pulmone m dextrum
33. Add the ending: **ligamentum capit... femoris** (ligament of head of femur)
a) -i b) -e c) -um d) -a e) -is
34. Add the ending: **ligamentum articular... superior** (superior articular ligament)
a) -i b) -e c) -um d) -a e) -is
35. Add the ending: **tendo muscul... tibialis** (tendon of tibial muscle)
a) -i b) -e c) -um d) -a e) -is

Attachment № 2 to the option № 6

Provide Nom. and Gen. of Sing. for following phrases:

36. membrum, i n – inferior, ius
37. foramen, inis n – nutricius, a, um
38. arteria, ae f – occipitalis, e
39. facies, ei f – anterior, ius
40. arcus, us m – posterior, ius

Attachment № 1 to the option № 7

Затверджено на засіданні профільної методичної комісії з філологічних дисциплін

Протокол №..... від "....."20.....року.

Голова профільної методичної комісії доц. Смольська Л.Ю.

OPTION 7

1. The **3rd** declination nouns are:
a) fossa, cornu, processus b) meatus, arcus, musculus c) margo, basis, tuberositas d) facies, genu, rete
2. Adjective **verus, a, um** means:
a) various b) big c) mucous d) true e) great
3. **2nd** group adjectives are:
a) verus, articularis, vertebralis; b) facialis, lateralis, occipitalis; c) acusticus, scapularis, inferior d) par, verus, cavus
4. **1st** group adjectives are:
a) thoracicus, antierius, planus b) simplex, dentalis, biceps c) longus, dexter, mucosus d) saluber, sinister, nervosus
5. Choose the ending of the term **fissura pulmon...**: (fissure of lung)
a) - us b) - ae c) - i d) - is e) - a
6. Which term is used in **Nom.Pl.**:
a) musculo transverso b) canalibus tympanicis c) sulci palatini d) tubercis ischiadici.
7. Choose the term formed by **Nn An**:
a) arcus vertebrae b) os palatinum c) collum scapulae d) corpus sterni
8. Choose the term formed by **Nn Ng**:
a) ala minor b) apex pulmonis c) collum anatomicum d) lamina medialis
9. The noun **ductus, us m** belongs to:
a) 1st declination b) 3rd declination c) 4th declination d) 2nd declination
10. The noun **tuberositas, atis f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 2nd declination
11. The noun **costa, ae f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 1st declination
12. The gender of the term **ligamentum profundum**:
a) masculine b) feminine c) neutral
13. The gender of the term **arcus anterior**:
a) masculine b) feminine c) neutral
14. The gender of the term **cartilago costalis**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **tuberosity of muscle** is:
a) tuberositas musculi b) tuberositatis musculi c) tuberositates musculi d) tuberositas musculorum
16. The correct translation of the term **apex of tongue** is:
a) apices linguae b) apex linguae c) apicis linguae d) apicum linguarum
17. The correct translation of the term **neck of ribs** is:
a) colla costae b) colli costae c) collum costarum d) collum costae
18. The correct translation of the term **angle of muscle** is:
a) anguli musculi b) angulus musculorum c) anguli musculorum d) angulus musculi
19. The correct translation of the term **lamina of tooth** is:

- a) lamina dentis b) lamina dentium c) laminae dentis d) laminae dentium
20. The correct translation of the term **occipital artery** is:
a) arteria occipitalia b) arteriae occipitalis c) arteria occipitale d) arteria occipitalis
21. The correct translation of the term **oral cavity** is:
a) cavitas ossis b) cavitas oris c) cavitatis oris d) cavitas os
22. The correct translation of the term **lateral cartilage** is:
a) cartilago lateralis b) cartilaginis lateralis c) cartilago laterale d) cartilaginis laterale
23. The correct translation of the term **internal base** is:
a) basis internus b) basis interna c) basis internum d) basis internae
24. The correct translation of the term **parietal bone** is:
a) os parietale b) ossa parietalia c) ossa parietale d) os parietalis
25. The correct translation of the term **superior foramen** is:
a) foramen superior b) foramen superioris c) foramen superius d) foraminis superioris
26. The Genitive Singular form of the term **vena temporalis** is:
a) venae temporale b) venae temporalis c) venarum temporalium d) venae temporales
27. The Genitive Singular form of the term **processus spinosus** is:
a) processus spinosus b) processi spinosi c) processus spinosi d) processus spinosorum
28. The Genitive Singular form of the term **tuberculum occipitale** is:
a) tuberculi occipitale b) tuberculi occipitalia c) tuberculi occipitales d) tuberculi occipitalis
29. The Genitive Singular form of the term **plica longitudinalis** is:
a) plicae longitudinalis b) plicae longitudinales c) plicae longitudinali d) plicae longitudinales
30. The Genitive Singular form of the term **fissura ligamenti** is:
a) fissura ligamenta b) fissura ligamentum c) fissurae ligamenti d) fissurae ligamentis
31. The Genitive Singular form of the term **cartilago nasi** is:
a) cartilagin is nasis b) cartilagin is nasus c) cartilago nasis d) cartilagin is nasi
32. The Genitive Singular form of the term **dens serotinus** is:
a) dentis serotinis b) dentis serotini c) dentis serotinus d) dentis serotinae
33. Add the ending: **fissura orbital... superior** (superior orbital fissure)
a) -i b) -ae c) -um d) -a e) - is
34. Add the ending: **musculus pectoral... minor** (small pectoral muscle)
a) -i b) -ae c) -um d) -a e) - is
35. Add the ending: **musculus palpebr... superioris** (muscle of superior eyelid)
a) -i b) -ae c) -um d) -a e) - is

Attachment № 2 to the option № 7

Provide Nom. and Gen. of Sing. of following phrases:

36. incisura, ae f – profundus, a, um
37. canalis, is m – inferior, ius
38. cranium, i n – visceralis, e
39. tuberculum, i n – articularis, e
40. os, ossis n – pelvinus, a, um

Attachment № 1 to the option № 8

OPTION 8

1. The 3rd declination nouns are:
a) cavitas, homo, dens b) vas, species, angulus c) pars, basis, scapula d) cornu, ramus, dies
2. Adjective **profundus, a, um** means:
a) wide b) round c) deep d) professional e) great
3. 2nd group adjectives are:
a) acutus, recens, biceps b) triceps, basalis, major c) acusticus, cranialis, inferior d) centralis, longus, nutricius
4. 1st group adjectives are:
a) latus, medius, celer b) teres, opticus, sacer c) radialis, sternalis, lateralis d) spinosus, verus, dextre
5. Choose the ending of the term **basis oss...**: (base of bone)
a) - us b) - ae c) - i d) - is e) - a
6. Which term is used in **Nom.Pl.**:
a) vertebrae coccygeae b) collo anatomico c) alae majoris d) pedem planum
7. Choose the term formed by **Nn An**:
a) cavitas thoracis b) lamina dentis c) os sacrum d) apex linguae
8. Choose the term formed by **Nn Ng**:
a) basis ossis b) ala minor c) sulcus caroticus d) foramen spinosum
9. The noun **meatus, us m** belongs to:
a) 1st declination b) 4th declination c) 3rd declination d) 5th declination
10. The noun **cavitas, atis f** belongs to:
a) 2nd declination b) 4th declination c) 3rd declination d) 1st declination
11. The noun **caries, ei f** belongs to:
a) 2nd declination b) 5th declination c) 3rd declination d) 1st declination
12. The gender of the term **foramen spinosum**:
a) masculine b) feminine c) neutral
13. The gender of the term **facies costalis**:
a) masculine b) feminine c) neutral
14. The gender of the term **sinus posterior**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **crest of tubercle** is:
a) crista tuberculum b) crista tuberculi c) cristae tuberculum d) cristae tuberculi
16. The correct translation of the term **incisure of scapula** is:
a) incisura scapulae b) incisura scapula c) incisurae scapulae d) incisurae scapula
17. The correct translation of the term **process of bone** is:
a) processus ossis b) processuum ossium c) processi ossis d) processus os
18. The correct translation of the term **cartilage of nose** is:
a) cartilaginis nasus b) cartilago nasi c) cartilaginis nasi d) cartilago nasus
19. The correct translation of the term **lamina of arch** is:

- a) laminae arcus b) lamina arcu c) lamina arcus d) arcus lamina
20. The correct translation of the term **temporal bone** is:
a) os temporalis b) ossis temporalis c) os temporale d) ossa temporalia
21. The correct translation of the term **internal base** is:
a) basis internis b) bases internae c) basis interna d) basis internae
22. The correct translation of the term **true rib** is:
a) costa verus b) costa vera c) costa verum d) costae verae
23. The correct translation of the term **lymphatic vessel** is:
a) vasa lymphatica b) vas lymphatica c) vas lymphaticus d) vas lymphaticum
24. The correct translation of the term **articular surface** is:
a) faciei articularis b) facies articulare c) facies articulares d) facies articularis
25. The correct translation of the term **occipital protuberance** is:
a) protruberantia occipitalis b) protruberantia occipitales c) protruberantia occipitalia d) protruberantia occipitale
26. The Genetive Singular form of the term **arteria maxillaris** is:
a) arteriae maxillare b) arteriae maxillaris c) arterium maxillarium d) arteriae maxillares
27. The Genetive Singular form of the term **processus spinosus** is:
a) processus spinosi b) processus spinosus c) processu spinosi d) processis spinosis
28. The Genetive Singular form of the term **vena labialis** is:
a) venae labialis b) venae labiales c) vena labialia d) vena labialis
29. The Genetive Singular form of the term **nervus occipitalis** is:
a) nervi occipitali b) nervi occipitalis c) nervus occipitalium d) nervus occipitali
30. The Genetive Singular form of the term **caput costae** is:
a) capita costa b) capitis costa c) caput costae d) capitis costae
31. The Genetive Singular form of the term **margo lacrimalis** is:
a) margini lacrimali b) marginis lacrimalis c) margina lacrimalia d) marginis lacrimali
32. The Genetive Singular form of the term **ren sinister** is:
a) ren sinister b) renis sinistris c) renis sinistri d) ren sinistra
33. Add the ending: **spina tympanic... minor** (minor tympanic spine)
a) -i b) -ae c) -um d) -a e) -is
34. Add the ending: **facies al... minoris** (surface of minor wing)
a) -i b) -ae c) -um d) -a e) -is
35. Add the ending: **linea glute... anterior** (anterior gluteal line)
a) -i b) -ae c) -um d) -a e) -is

Attachment № 2 to the option № 8

Provide Nom. and Gen. of Sing. for following phrases:

36. sulcus, i m – palatinus, a, u m
37. caput, it is n – longus, a, u m
38. cartilago, inis f – costalis, e
39. ligamentum, i n – profundus, a, u m
40. margo, inis m – occipitalis, e

Attachment № 1 to the option № 9

Затверджено на засіданні профільної методичної комісії з філологічних дисциплін

Протокол №..... від "....."20.....року.

Голова профільної методичної комісії доц. Смольська Л.Ю.

OPTION 9

1. The **3rd** declination nouns are:
a) dolor, sternum, scapula b) digitus, genu, processus c) arteria, collum, facies d) pars, apex, radix
2. Adjective **dexter, tra, trum** means:
a) deteriorated b) compound c) simple d) right e) great
3. **2nd** group of adjectives are:
a) spurius, par, dorsalis b) simplex, brevis, frontalis c) acusticus, scapularis, inferior d) spinalis, cavus, internus
4. **1st** group of adjectives are:
a) latus, superior, osseus b) muscularis, costalis, facialis c) spurius, dexter, opticus d) liber, celer, posterior
5. Choose the ending of the term **sulcus arteri** ...: (grove of artery)
a) - us b) - ae c) - i d) - is e) - a
6. Which term is used in **Nom.Pl.**:
a) arteriae occipitales b) osse sacro c) facierum anteriorum d) dosibus minimis
7. Choose the term formed by **Nn An**:
a) lamina dentis b) os cranii c) os cranii d) costa spuria
8. Choose the term formed by **Nn Ng**:
a) arteria occipitalis b) sulcus costae c) meatus acusticus d) pars squamosa
9. The noun **caput, itis n** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 5th declination
10. The noun **processus, us m** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 5th declination
11. The noun **rabies, ei f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 1st declination
12. The gender of the term **ligamentum abdominale**:
a) masculine b) feminine c) neutral
13. The gender of the term **pulmo dexter**:
a) masculine b) feminine c) neutral
14. The gender of the term **pars lateralis**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **cavity of lung** is:
a) cavitas pulmo b) cavitatis pulmonis c) cavitas pulmonis d) cavitates pulmonis
16. The correct translation of the term **root of tooth** is:
a) radice dentis b) radix dentis c) radice dentium d) radices dentis
17. The correct translation of the term **angle of breastbone** is:
a) angulus sternorum b) angulus sterni c) anguli sternum d) anguli sterni
18. The correct translation of the term **apex of root** is:
a) apicis radice b) apex radix c) apex radice d) radix apicis
19. The correct translation of the term **incisure of lung** is:

- a) incisura pulmo b) incisura pulmonis c) incisurae pulmo d) incisurae pulmonis
20. The correct translation of the term **temporal bone** is:
a) os temporalis b) ossis temporalis c) os temporale d) ossa temporalia
21. The correct translation of the term **external ear** is:
a) auris externis b) auris externus c) auris externa d) auris externum
22. The correct translation of the term **left part** is:
a) pars sinister b) pars sinistra c) pars sinistrum d) pars sinistrae
23. The correct translation of the term **internal base** is:
a) basis internus b) basis interna c) basis internum d) basis internis
24. The correct translation of the term **yellow body** is:
a) corpus flavus b) corpus flava c) corpus flavum d) corporis flavi
25. The correct translation of the term **alveolar foramen** is:
a) foramen alveolare b) foramen alveolaris c) foramen alveolaria d) foraminis alveolaris
26. The Genetive Singular form of the term **cor bovinum** is:
a) cordis bovinis b) cordis bovini c) cordium bovinum d) cordis bovinus
27. The Genetive Singular form of the term **processus spinosus** is:
a) processus spinosus b) processus spinosi c) processi spinosi d) processuum spinosum
28. The Genetive Singular form of the term **cavitas profunda** is:
a) cavitas profundae b) cavitatis profundi c) cavitatis profundae d) cavitatis profundis
29. The Genetive Singular form of the term **ligamentum intercostale** is:
a) ligamenti intercostalae b) ligamenti intercostali c) ligamenti intercostalis d) ligamenti intercostale
30. The Genetive Singular form of the term **caput costae** is:
a) capitis costae b) capitis costa c) caput costa d) capita costa
31. The Genetive Singular form of the term **processus ossis** is:
a) processus ossis b) processi ossis c) processus ossa d) processi ossa
32. The Genetive Singular form of the term **vena labialis** is:
a) venae labialae b) venae labiali c) venae labialis d) venae labialia
33. Add the ending: **arteria transvers... superior** (transverse superior artery)
a) -i b) -e c) -um d) -a e) -is
34. Add the ending: **canalis nerv... petrosi** (canal of petrous nerve)
a) -i b) -e c) -um d) -a e) -is
35. Add the ending: **foramen ethmoidal... posterius** (posterior ethmoidal foramen)
a) -i b) -e c) -um d) -a e) -is

Attachment № 2 to the option № 9

Provide Nom. and Gen. of Sing. for following phrases:

36. lamina, ae f – medialis, e
37. foramen, inis n – superior, ius
38. ductus, us m – sinister, tra, trum
39. lamina, ae f – posterior, ius
40. pulmo, onis m – dexter, tra, trum

Attachment № 1 to the option № 10

Затверджено на засіданні профільної методичної комісії з філологічних дисциплін

Протокол №..... від "....."20.....року.

OPTION 10

1. The 3rd declination nouns are:
a) cor, lamina, cranium b) pulmo, cartilago, articulatio c) abdomen, caput, arcus d) membrum, brachium, atrium
2. Adjective **spurius, a, um** means:
a) spare b) insufficient c) long d) false e) great
3. 2nd group adjectives are:
a) vertebralis, medialis, anterior b) costalis, longus, biceps c) acusticus, inferior, asper d) ulnaris, proprius, latus
4. 1st group adjectives are:
a) pubicus, inferius, planus b) sinister, osseus, latus c) venosus, teres, distalis d) magnus, coccygeus, sternalis
5. Choose the ending of the term **nucleus nerv...**: (nucleus of nerve)
a) – i b) – ae c) – us d) – is e) – a
6. Which term is used in **Nom.Pl.**:
a) cutem siccam b) septis osseis c) cartilagine costales d) retibus venosis
7. Choose the term formed by **Nn An**:
a) arcus vertebrae b) apertura thoracis c) angulus sterni d) membrum inferius
8. Choose the term formed by **Nn Ng**:
a) columna vertebralis b) spina scapulae c) sulcus palatinus d) arcus anterior
9. The noun **genu, us n** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 5th declination
10. The noun **apex, icis m** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 5th declination
11. The noun **fides, ei f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 1st declination
12. The gender of the term **facies anterior** is:
a) masculine b) feminine c) neutral
13. The gender of the term **foramen nutricium** is:
a) masculine b) feminine c) neutral
14. The gender of the term **margo occipitalis** is:
a) masculine b) feminine c) neutral
15. The correct translation of the term **body of breastbone** is:
a) corpus sternus b) corpus sternum c) corpus sterni d) corporis sternum
16. The correct translation of the term **crest of tubercle** is:
a) crista tuberculum b) cristae tuberculum c) crista tuberculus d) crista tuberculi
17. The correct translation of the term **tubercle of muscle** is:
a) tuberculus musculus b) tuberculus musculi c) tuberculum musculi d) tuberculi musculus
18. The correct translation of the term **lamina of arch** is:
a) lamina arcus b) lamina arcuum c) laminae arcus d) laminae arcuum
19. The correct translation of the term **apex of lung** is:

- a) apicis pulmonis b) apex pulmonis c) apicis pulmonum d) apicis pulmone
20. The correct translation of the term **temporal bone** is:
a) os temporalis b) ossis temporalis c) os temporale d) ossis temporale
21. The correct translation of the term **small horn** is:
a) cornu minus b) cornus minus c) cornu minor d) cornu minoris
22. The correct translation of the term **occipital lobe** is:
a) lobus occipitale b) lobi occipitalis c) lobus occipitale d) lobus occipitalis
23. The correct translation of the term **lateral cartilage** is:
a) cartilago laterale b) cartilagin is lateralis c) cartilago lateralis d) cartilagin is laterale
24. The correct translation of the term **capillary vessel** is:
a) vas capillaris b) vasa capillaria c) vasis capillaris d) vas capillare
25. The correct translation of the term **superior foramen** is:
a) foramen superior b) foramen superioris c) foramen superius d) foraminis superioris
26. The Genetive Singular form of the term **fascia cervicalis** is:
a) fascia cervicalia b) fasciae cervicale c) fascia cervacale d) fasciae cervicalis
27. The Genetive Singular form of the term **processus spinosus** is:
a) processus spinosus b) processus spinosi c) processi spinosi d) processuum spinosum
28. The Genetive Singular form of the term **facies articularis** is:
a) facies articularis b) faciei articularis c) faciae articularis d) facie articulare
29. The Genetive Singular form of the term **tuberositas deltoidea** is:
a) tuberositatis deltoideae b) tuberositatis deltoidei c) tuberositatis deltoideus d) tuberositas deltoideus
30. The Genetive Singular form of the term **caput femoris** is:
a) caput femur b) capitis femorale c) caput femoris d) capitis femoris
31. The Genetive Singular form of the term **arcus vertebrae** is:
a) arcus vertebrae b) arci vertebrae c) arcus vertebri d) arcuum vertebrarum
32. The Genetive Singular form of the term **foramen parietale** is:
a) foramen parietalis b) foramen parietale c) foramina parietalia d) foraminis parietalis
33. Add the ending: **facies tubercul... costae** (tubercle of surface of rib)
a) -i b) -ae c) -um d) -us e) -is
34. Add the ending: **crista coll... costae** (crest of neck of rib)
a) -i b) -ae c) -um d) -us e) -is
35. Add the ending: **tuberculum arc... vertebrae** (tubercle of arch of vertebra)
a) -i b) -ae c) -um d) -us e) -is

Attachment № 2 to the option № 10

Provide Nom. and Gen. of Sing. for following phrases:

36. collum, i n – anatomicus, a, u m
37. foramen, inis n – superior, ius
38. costa, ae f – verus, a, u m
39. meatus, us m – acusticus, a, u m
40. os, ossis n – occipitalis, e

Attachment № 1 to the option № 11

OPTION 11

1. The 3rd declination nouns are:
a) spina, cornu, corpus b) columna, os, canalis c) corpus, basis, tuberositas d) dens, arcus, dosis
2. The adjective **flavus, a, um** means:
a) large b) oblique c) white d) yellow e) flat
3. 1st group adjectives are:
a) longus, anterior, palatinus b) vertebralis, dentalis, facialis c) thoracicus, dexter, rotundus d) par, dexter, latus
4. 2nd group adjectives are:
a) spurius, brevis, vertebralis b) biceps, lateralis, occipitalis c) acusticus, scapularis, inferior d) par, latus, longus
5. Choose the ending of the term **pars hepat...** (part of liver)
a) - us b) - ae c) - i d) - is e) - um
6. Which term is used in **Nom.Pl.**:
a) ligamenta transversa b) lamina profunda c) sulcis venosis d) ossis brevis
7. Choose the term formed by **Nn An**:
a) lamina dentis b) os zygomaticum c) os cranii d) tuderculum ossis
8. Choose the term formed by **Nn Ng**:
a) ala major b) apex ossis c) collum anatomicum d) os sinistrum
9. The noun **arcus, us m** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 1st declination
10. The noun **corpus, oris n** belongs to:
a) 2nd declination b) 3rd declination c) 4th declination d) 1st declination
11. The noun **facies, ei f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 1st declination
12. The gender of the term **cornu minus**:
a) masculine b) feminine c) neutral
13. The gender of the term **canalis vertebralis**:
a) masculine b) feminine c) neutral
14. The gender of the term **extremitas superior**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **crest of tubercle** is:
a) crista tuberculi b) crista tuberculum c) crista tuberculorum d) crista tubercula
16. The correct translation of the term **lamina of arch** is:
a) lamina arcus b) lamina arcuum c) laminae arcus d) laminarum arcus
17. The correct translation of the term **body of breastbone** is:
a) corpus sterni b) corpus sternum c) corporis sternum d) corporis sternum
18. The correct translation of the term **tubercle of muscle** is:
a) tuberculum musculus b) tuberculorum musculi c) tuberculum musculi d) tuberculum musculorum
19. The correct translation of the term **incisure of scapula** is:

- a) incisura scapula b) incisura scapulae c) incisurae scapulae d) incisurarum scapularum
20. The correct translation of the term **temporal bone** is:
a) os temporalis b) ossis temporalis c) os temporale d) ossa temporalia
21. The correct translation of the term **compound articulation** is:
a) articulatio compositus b) articulatio composita c) articulatio compositum d) articulationis compositae
22. The correct translation of the term **true rib** is:
a) costa verus b) costa vera c) costa verum d) costae verae
23. The correct translation of the term **squamous part** is:
a) partis spongiosa b) pars squamosa c) partes squamosae d) pars squamosus
24. The correct translation of the term **superior process** is:
a) processus superius b) processus superior c) processus superioris d) processus superiori
25. The correct translation of the term **superior foramen** is:
a) foramen superior b) foramen superioris c) foramen superius d) foramina superiora
26. The genitive singular form of the term **sutura squamosa** is:
a) suturis squamosis b) suturis squamosae c) suturae squamosae d) suturarum squamosarum
27. The genitive singular form of the term **processus spinosus** is:
a) processus spinosus b) processus spinosi c) processi spinosi d) processui spinoso
28. The genitive singular form of the term **facies articularis** is:
a) facies articularis b) faciei articularis c) faciem articulare m d) facies articulares
29. The genitive singular form of the term **tuberositas deltoidea** is:
a) tuberositatem deltoideam b) tuberositatis deltoideae c) tuberositates deltoideae d) tuberositatum deltoidearum
30. The genitive singular form of the term **caput femoris** is:
a) capitis femoris b) caput femorale c) capita femoris d) capite femoris
30. The genitive singular form of the term **arcus vertebrae** is:
a) arcus vertebralis b) arcui vertebrae c) arcubus vertebrae d) arcus vertebrae
32. The genitive singular form of the term **pulmo dexter** is:
a) pulmonum dextrorum b) pulmonis dextri c) pulmones dextri d) pulmone m dextrum
33. Add the ending: **incisura cardiac... pulmonis** (cardiac incisure of lung)
a) -i b) -ae c) -um d) -a e) -is
34. Add the ending: **foramen alveolar... posterior** (posterior alveolar foramen)
a) -i b) -e c) -um d) -us e) -is
35. Add the ending: **processus articular... superior** (superior articular process)
a) -i b) -ae c) -um d) -us e) -is

Attachment № 2 to the option № 11

Provide Nom. and Gen. of Sing. for following phrases:

36. foramen, inis n – vertebralis, e
37. musculus, i m – isdhiadicus, a, um
38. incisura, ae f – profundus, a, um
39. meatus, us m – acusticus, a, um
40. arcus, us m – anterior, ius

OPTION 12

1. The 3rd declination nouns are:
a) fossa, cornu, processus b) meatus, arcus, musculus c) margo, basis, tuberositas d) facies, genu, rete
2. Adjective **verus, a, um** means:
a) various b) big c) mucous d) true e) great
3. 2nd group adjectives are:
a) verus, articularis, vertebralis; b) facialis, lateralis, occipitalis; c) acusticus, scapularis, inferior d) par, verus, cavus
4. 1st group adjectives are:
a) thoracicus, antierius, planus b) simplex, dentalis, biceps c) longus, dexter, mucosus d) saluber, sinister, nervosus
5. Choose the ending of the term **lamina process...** (layer of process)
a) - us b) - ae c) - i d) - is e) - a
6. Which term is used in **Nom.Pl.**:
a) musculo transverso b) canalibus tympanicis c) sulci palatini d) tubercis ischiadici.
7. Choose the term formed by **Nn An**:
a) arcus vertebrae b) os palatinum c) collum scapulae d) corpus sterni
8. Choose the term formed by **Nn Ng**:
a) ala minor b) apex pulmonis c) collum anatomicum d) lamina medialis
9. The noun **ductus, us m** belongs to:
a) 1st declination b) 3rd declination c) 4th declination d) 2nd declination
10. The noun **tuberositas, atis f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 2nd declination
11. The noun **costa, ae f** belongs to:
a) 2nd declination b) 3rd declination c) 5th declination d) 1st declination
12. The gender of the term **ligamentum profundum**:
a) masculine b) feminine c) neutral
13. The gender of the term **arcus anterior**:
a) masculine b) feminine c) neutral
14. The gender of the term **cartilago costalis**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **tuberosity of muscle** is:
a) tuberositas musculi b) tuberositatis musculi c) tuberositates musculi d) tuberositas musculorum
16. The correct translation of the term **apex of tongue** is:
a) apices linguae b) apex linguae c) apicis linguae d) apicum linguarum
17. The correct translation of the term **neck of ribs** is:
a) colla costae b) colli costae c) collum costarum d) collum costae
18. The correct translation of the term **angle of muscle** is:
a) anguli musculi b) angulus musculorum c) anguli musculorum d) angulus musculi
19. The correct translation of the term **lamina of tooth** is:

- a) lamina dentis b) lamina dentium c) laminae dentis d) laminae dentium
20. The correct translation of the term **occipital artery** is:
a) arteria occipitalia b) arteriae occipitalis c) arteria occipitale d) arteria occipitalis
22. The correct translation of the term **oral cavity** is:
a) cavitas ossis b) cavitas oris c) cavitatis oris d) cavitas os
22. The correct translation of the term **lateral cartilage** is:
a) cartilago lateralis b) cartilagin is lateralis c) cartilago laterale d) cartilagin is laterale
23. The correct translation of the term **internal base** is:
a) basis internus b) basis interna c) basis internum d) basis interna
24. The correct translation of the term **parietal bone** is:
a) os parietale b) ossa parietalia c) ossa parietale d) os parietalis
25. The correct translation of the term **superior foramen** is:
a) foramen superior b) foramen superioris c) foramen superius d) foraminis superioris
26. The genitive singular form of the term **vena temporalis** is:
a) venae temporale b) venae temporalis c) venarum temporalium d) venae temporales
27. The genitive singular form of the term **processus spinosus** is:
a) processus spinosus b) processi spinosi c) processus spinosi d) processus spinosorum
28. The genitive singular form of the term **tuberculum occipitale** is:
a) tuberculi occipitale b) tuberculi occipitalia c) tuberculi occipitales d) tuberculi occipitalis
29. The genitive singular form of the term **plica longitudinalis** is:
a) plicae longitudinalis b) plicae longitudinales c) plicae longitudinali d) plicae longitudinales
30. The genitive singular form of the term **fissura ligamenti** is:
a) fissura ligamenta b) fissura ligamentum c) fissurae ligamenti d) fissurae ligamentis
31. The genitive singular form of the term **cartilago nasi** is:
a) cartilagin is nasis b) cartilagin is nasus c) cartilago nasis d) cartilagin is nasi
32. The genitive singular form of the term **dens serotinus** is:
a) dentis serotinis b) dentis serotini c) dentis serotinus d) dentis serotinae
33. Add the ending: **cornu sacral... dextrum** (left sacral horn)
a) -i b) -e c) -um d) -us e) -is
34. Add the ending: **apex radic... dentis** (apex of root of tooth)
a) -i b) -ae c) -um d) -us e) -is
35. Add the ending: **facies pelvin... ossis** (pelvic surface of bone)
a) -i b) -a c) -um d) -us e) -is

Attachment № 2 to the option № 12

Provide Nom. and Gen. of Sing. for following phrases:

36. ala, ae f – major, ius
37. foramen, inis n – superior, ius
38. musculus, i m – longus, a, u m
39. meatus, us m – acusticus, a, u m
40. os, ossis n – occipitalis, e

OPTION 13

1. The 3rd declination nouns are:
a) cavitas, homo, dens b) vas, species, angulus c) pars, basis, scapula d) cornu, ramus, dies
2. Adjective **profundus, a, um** means:
a) wide b) round c) deep d) professional e) great
3. 2nd group adjectives are:
a) acutus, recens, biceps b) triceps, basalis, major c) acusticus, cranialis, inferior d) centralis, longus, nutricius
4. 1st group adjectives are:
a) latus, medius, celer b) teres, opticus, sacer c) radialis, sternalis, lateralis d) spinosus, verus, dextre
5. Choose the ending of the term **caput oss...**: (head of bone)
a) - us b) - ae c) - i d) - is e) - a
6. Which term is used in **Nom.Pl.**:
a) vertebrae coccygeae b) collo anatomico c) alae majoris d) pedem planum
7. Choose the term formed by **Nn An**:
a) cavitas thoracis b) lamina dentis c) os sacrum d) apex linguae
8. Choose the term formed by **Nn Ng**:
a) basis ossis b) ala minor c) sulcus caroticus d) foramen spinosum
9. The noun **meatus, us m** belongs to:
a) 1st declination b) 4th declination c) 3rd declination d) 5th declination
10. The noun **cavitas, atis f** belongs to:
a) 2nd declination b) 4th declination c) 3rd declination d) 1st declination
11. The noun **caries, ei f** belongs to:
a) 2nd declination b) 5th declination c) 3rd declination d) 1st declination
12. The gender of the term **foramen spinosum**:
a) masculine b) feminine c) neutral
13. The gender of the term **facies costalis**:
a) masculine b) feminine c) neutral
14. The gender of the term **sinus posterior**:
a) masculine b) feminine c) neutral
15. The correct translation of the term **crest of tubercle** is:
a) crista tuberculum b) crista tuberculi c) cristae tuberculum d) cristae tuberculi
16. The correct translation of the term **incisure of scapula** is:
a) incisura scapulae b) incisura scapula c) incisurae scapulae d) incisurae scapula
17. The correct translation of the term **process of bone** is:
a) processus ossis b) processuum ossium c) processi ossis d) processus os
18. The correct translation of the term **cartilage of nose** is:
a) cartilaginis nasus b) cartilago nasi c) cartilaginis nasi d) cartilago nasus
19. The correct translation of the term **lamina of arch** is:

- a) laminae arcus b) lamina arcu c) lamina arcus d) arcus lamina
20. The correct translation of the term **temporal bone** is:
a) os temporalis b) ossis temporalis c) os temporale d) ossa temporalia
21. The correct translation of the term **internal base** is:
a) basis internis b) bases interna c) basis interna d) basis interna
22. The correct translation of the term **true rib** is:
a) costa verus b) costa vera c) costa verum d) costae verae
23. The correct translation of the term **lymphatic vessel** is:
a) vasa lymphatica b) vas lymphatica c) vas lymphaticus d) vas lymphaticum
24. The correct translation of the term **articular surface** is:
a) faciei articularis b) facies articulare c) facies articulares d) facies articularis
25. The correct translation of the term **occipital protuberance** is:
a) protruberantia occipitalis b) protruberantia occipitale c) protruberantia occipitalia d) protruberantia occipitale
26. The genitive singular form of the term **arteria maxillaris** is:
a) arteriae maxillare b) arteriae maxillaris c) arterium maxillarium d) arteriae maxillares
27. The genitive singular form of the term **processus spinosus** is:
a) processus spinosi b) processus spinosus c) processus spinosi d) processis spinosis
28. The genitive singular form of the term **vena labialis** is:
a) venae labialis b) venae labiales c) vena labialia d) vena labialis
29. The genitive singular form of the term **nervus occipitalis** is:
a) nervi occipitali b) nervi occipitalis c) nervus occipitalium d) nervus occipitali
30. The genitive singular form of the term **caput costae** is:
a) capita costa b) capitis costa c) caput costae d) capitis costae
31. The genitive singular form of the term **margo lacrimalis** is:
a) margini lacrimali b) marginis lacrimalis c) margina lacrimalia d) marginis lacrimali
32. The genitive singular form of the term **ren sinister** is:
a) ren sinister b) renis sinisteris c) renis sinistri d) ren sinistra
33. Add the ending: **tuberculum muscul... anterioris** (tubercle of anterior muscle)
a) -i b) -ae c) -um d) -a e) -e
34. Add the ending: **foramen sacral... pelvinum** (sacral pelvic foramen)
a) -i b) -ae c) -um d) -a e) -e
35. Add the ending: **incisura cardiac... pulmonis** (cardiac incisure of lung)
a) -i b) -ae c) -um d) -a e) -e

Attachment № 2 to the option № 13

Provide Nom. and Gen. of Sing. for following phrases:

36. caput, it is n – obliquus, a, um

37. foramen, inis n – superior, ius

38. costa, ae f – verus, a, um

39. meatus, us m – acusticus, a, um

40. os, ossis n – occipitalis, e
