**Senyuta I. Y, Tereshko Kh. Y.** Vaccination in questions and answers: methodical recommendations. [Electronic resource]: [Website]. - Access mode: [http://unba.org.ua/assets/uploads/77b7b540396ed691df9b\\_file.pdf](http://unba.org.ua/assets/uploads/77b7b540396ed691df9b_file.pdf).

Current recommendations disclose the definitions of key concepts, the list of rights in case of vaccination; and reveal the types of vaccinations (voluntary, recommended, obligatory, compulsory). Jurisprudence of the European Court of Human Rights in the context of human rights and vaccination are separately highlighted. The restrictions on the rights of individuals who have not been vaccinated, the rules for the implementation of preventive vaccinations, as well as the proportion of the right to education with the right to preventive vaccination and ways to protect the rights violated have been disclosed.

Methodological recommendations are presented in the form of questions and answers, contain clear algorithms, and make up a kind of "instruction" for the implementation and protection of human rights. They can be useful for patients, their legal representatives, a wide range of practicing lawyers and health care professionals.

**Senyuta I.Y., Klapaty D.Y.** Psychiatric care: mechanisms to ensure the rights of patients and their legal representatives. - Lviv: Publishing house of Lviv regional charitable fund “Medicine and Law”, 2013. - 66 p.

The manual is designed to outline such an important segment of the national mental health system as human rights. It describes the legal status of persons suffering from mental disorders, and also outlines the implementation and mechanisms for the protection of key rights while providing psychiatric care. In particular, the publication contains the answers to frequently asked questions in the exercise of the right to information about the state of mental health and the provision of psychiatric care, the right to a secret on the state of health, the rights of legal representatives of persons suffering from mental disorder, to receive a monthly cash aid, etc. In addition, the book highlights the peculiarities of conducting a psychiatric examination, the rights of persons in the provision of outpatient and inpatient psychiatric care, and the procedure for terminating the provision of psychiatric care in a coercive manner. It is also useful to highlight the procedure for the implementation of the right of the named persons to protect their violated, unrecognized or challenged rights in a judicial and administrative procedure, as well as the right to free legal aid. The authors have prepared a manual designed to become a reliable advocate for the protection of human rights in the provision of psychiatric care, to expand the boundaries of scientific research and optimize legal practice in this field.
