

EVALUATION OF STUDENT LEARNING ACTIVITY
from the discipline
Neurology and neurodentistry
training of specialists of the second (master's) level of higher education
field of knowledge 22 "Healthcare"
specialty 221 "Dentistry"

In connection with the introduction of the credit-transfer-accumulation system, the assessment of knowledge and skills of fourth-year students of the dentistry faculty is carried out according to the following criteria:

A. – Assimilation of each topic of practical classes is assessed according to the *traditional system* with grades: «5», «4», «3», «2».

– The calculation of the number of points is based on the grades obtained by the student during the study of the discipline during the semester on a traditional scale, by calculating the arithmetic mean (AM), rounded to two decimal places; the value obtained is converted into points on a multi-point scale as follows: $x = (MA \times 200)$: 5.

B. – Maximum number of points for the current educational activity of the student: 200 points.

- The minimum number of points that a student must score for the current academic activity to enroll in the discipline is 120 points.

C. – Students' independent work is assessed during the current control of the topic in the relevant practical lesson.

D. – Mark of the discipline is based on the results of the implementation of the amount of educational material defined by the work program of the discipline, and in the timeframe set by the working curriculum. It is set on a two-point scale "passed" or "not passed".

To enroll, a student must receive for current academic activities at least 60% of the maximum amount of points in the discipline (120).

The form of final control is a credit.
