at a meeting of the Department of Neurology

“ 31“ August 2021

Head of the Department, Professor Nehrych T.I.

Methods and means of assessing the current educational activities of the student.

Current control is carried out during the practical lessons and is aimed at checking students mastering of educational material. The form of current control during training is determined by the working curriculum of the discipline.

The control is carried out at the preparatory and main stage of the lesson and the following forms of control are used - frontal oral express-examination, individual oral examination, structured written works based on tests, typical and complex specialized tasks such as license exam "Step-2" and also structured by procedure control of practical skills and abilities.

When mastering each topic of the module for the current educational activity of the student grades are given on 4-point traditional scale.

Criteria for evaluating the student's current educational activity:

Excellent ("5") – The student correctly, clearly, logically and completely answers all standardized questions of the current topic, including the questions of the lecture course and independent work. Closely binds theory to practice and correctly demonstrates the implementation (knowledge) of practical skills. Freely reads results of analysis, solves situational tasks of increased complexity, is able to generalize material, know methods of patients examination to the extent necessary for the doctor's activity. Completed the scheduled individual work.

Good ("4") – The student correctly and essentially answers the standardized questions of the current topic, including the questions of the lecture course and independent work. Demonstrates the implementation (knowledge) of practical skills. Correctly uses theoretical knowledge to solve practical tasks. Able to solve easy and medium complexity situational tasks. Possesses the 26 necessary practical skills and techniques of their execution in the amount exceeding the required minimum.

Satisfactory ("3") - Student incompletely, with the help of additional questions, answers standardized questions of the current topic, lecture course and independent work. Can not independently build a clear, logical answer. The student makes mistakes while answering and demonstrating practical skills. The student solves only the easiest tasks, knows only the required minimum of methods of study.

Unsatisfactory ("2") - The student does not know the material of the current topic, can not construct a logical answer, does not answer additional questions, does not understand the content of the material. The student makes significant, gross mistakes when answering and demonstrating practical skills.
