

TOPICS OF PRACTICAL CLASSES

№	Theme	Hours
1.	External examination of the pregnant woman. Biomechanism and clinical course of labor. Partogram. Primary care of the newborn.	7
2.	Preeclampsia, eclampsia. Sudden cessation of blood circulation in pregnant women. Cardiopulmonary resuscitation in pregnant women.	7
3.	Complicated labor. Pelvic presentation. Operative vaginal delivery	7
4.	Obstetric bleeding	7
5.	Special gynecological examination. Small gynecological operations.	5
	Total	35

SELF-STUDY OF STUDENTS

№	Type of SS	Hours	Types of control
1	Preparation for the practical lesson "External examination of the pregnant woman. Biomechanism and clinical course of labor. Partogram. Primary care of the newborn ". Unified clinical protocol of primary, secondary (specialized) and tertiary (highly specialized) medical care "Physiological labor" № 170 26.01.2022. The structure of the female pelvis. Planes of the pelvis. The concept of the leading point, the leading axis of the pelvis. The location of the fetus in the uterus. Biomechanism of labor. Record partograms. Thermal change.	5	Self-control Current control in practical classes
2	Preparation for the practical lesson "Preeclampsia, eclampsia. Sudden cessation of blood circulation in pregnant women. Cardiopulmonary resuscitation in pregnant women. " Unified clinical protocol of primary, secondary (specialized) and tertiary (highly specialized) medical care "Hypertensive disorders during pregnancy, childbirth and the postpartum period" № 151 24.01.2022 Diagnostic criteria for the severity of preeclampsia. Eclampsia. Differential diagnosis of convulsive syndrome in pregnant women (make a table). Clinical phases of eclampsia. Sudden cessation of blood circulation in pregnant women. Anatomical and physiological features of pregnant women that affect the success of CPR.	5	Self-control Current control in practical classes
3	Preparation for the practical lesson "Complicated labor. Breech presentation. Operative vaginal delivery. " Biomechanism of labor in pelvic presentation of the fetus. Anomalies of labor activity. Uterotonic drugs (dosage, method of administration).	5	Self-control Current control in practical classes

	<p>Conditions, indications, contraindications to the operation of low obstetric forceps.</p> <p>Conditions, indications, contraindications to the operation of vacuum extraction of the fetus.</p>		
4	<p>Preparation for the practical lesson "Obstetric bleeding." Obstetric Bleeding Clinical Protocol №205 24.03.2014.</p> <p>Antenatal bleeding. Differential diagnosis (table).</p> <p>Etiology of bleeding in the placental and early postpartum period (4 "T"). Permissible "physiological blood loss"</p> <p>Hemorrhagic shock. Infusion and transfusion therapy (drugs, solutions - dosage, routes of administration, prescriptions). Filling in the checklist PPH.</p>	5	<p>Self-control</p> <p>Current control in practical classes</p>
5	<p>Preparation for the practical lesson "Special gynecological examination. Small gynecological operations".</p> <p>Anatomy and topographic anatomy of female genitalia.</p> <p>Clinical protocol "Cervical dysplasia. Cervical cancer" № 236 2.04.2014.</p>		<p>Self-control</p> <p>Current control in practical classes</p>
