

The algorithm for evaluation of practical skills at stage № 7

Determination of the intensity of dental caries in a patient of childhood on orthopantomogram / deep fluoridation of teeth on a phantom

<i>№</i>	<i>Stages of performing the task</i>	<i>Criteria of evaluation</i>
1.	Get Orthopantomogram. To determine on a orthopantomogram the group of temporary and permanent teeth, a period of dentition;	<p>0.2 points - the student correctly identified on orthopantomogram the group of the temporary and permanent teeth, the period of dentition;</p> <p>0.1 points - the student has determined on the orthopantomogram a group of temporary and permanent teeth, but did not determine the period of dentition. The student did not identify on the orthopantomogram the group of the temporary and permanent teeth, but determined the period of dentition.</p> <p>0 points - the student did not determine the group of temporary and permanent teeth and dentition period on the orthopantomogram.</p>
2.	Determine carious teeth, filled teeth, missed teeth on the orthopantomogram.	<p>0.4 points - the student correctly identified the carious cavities, filled and missed teeth;</p> <p>0.2 points - the student did not diagnose one or several component of indexes;</p> <p>0 points - the student did not correctly determine the presence of carious cavities, filled and missed teeth;</p>
3.	Calculate the index of caries intensity according to the period of dentition.	<p>0.2 points - a student correctly calculated the index of caries intensity according to the period of dentition;</p> <p>0.1 point - the student wrongly chose the formula for calculating the index of incivility according to the dentition period.</p> <p>0 points - the student can not determine the period of dentition and correctly calculate the intensity of caries.</p>
4.	Perform the deep fluoridation of the enamel of the teeth on phantom	<p>0.2 points - the student correctly performed deep fluoridation of the enamel of the teeth with a means for deep fluoridation on a phantom.</p> <p>0.1 points - the student demonstrates individual phases of phantom manipulation, or manipulates in an incorrect sequence;</p> <p>0 points - the student can not conduct deep fluoridation of the enamel of the teeth on a phantom with means for deep fluoridation.</p>
