

Syllabus
 Practical training
 on Pediatric dentistry
 individual profile course of practical training
 (Surgical Dentistry)
B.Б 2.8

I. General information	
Name of faculty	Dentistry
Educational program (branch, specialty, level of higher education, form of education)	Field of knowledge 22 «Health care» Specialty 221 «Dentistry» second (master`s) level of higher education, full-time
Academic year	2023/2024
Name of discipline , code (e-mail address on the website of Danylo Halytskyi LNMU)	Practical training on Pediatric dentistry individual profile course of practical training (Surgical Dentistry) (Kaf_peddentistry@meduniv.lviv.ua)
Department (name, address, phone number, e-mail)	Pediatric Dentistry Lviv, Pekarska str 69v Tel. +38(032)276-32-41 Kaf_peddentistry@meduniv.lviv.ua
Chief of department (e-mail)	Oleksandr V. Kolesnichenko, PhD, Associate professor doctoralex1963@gmail.com
Year of study	Fifth
Semester	IX
Type of discipline/ module	Selective
Teachers (names, surnames, scientific degrees and titles of teachers who teach the discipline, e-mail)	Mykola B. Fur, PhD, Associate professor Olga B. Hrynyshyn, PhD, Associate professor
Erasmus yes/no (discipline availability for students within the Erasmus program)	Yes
Person responsible for syllabus (e-mail)	Mykola B. Fur, PhD, Associate professor Kaf_peddentistry@meduniv.lviv.ua
Number of credits ECTS	3,5
Number of hours (lectures/practical classes/individual work of student)	105 Practical classes – 54 Individual work - 51
Language of studying	English
Information for consultation	Consultations are held according to the schedule
Address, telephone and schedule of clinical base	Lviv, Pekarska str 69v Tel. +38(032)276-32-41
2. A short abstract of the discipline	
<p>Pediatric dentistry is a complex and multi-component specialty, where a specialist acting as a dentist must also think like a pediatrician. The preparation and activity of such a specialist requires a lot of effort, skill, time and energy. Every specialist who works with children should know the peculiarities of the antenatal and postnatal periods of development and formation of hard tissues of the teeth, jaw bones, and soft tissues of the face, as well as how these processes are affected by the health of the future mother and the child itself, various negative factors that can lead to the occurrence and development of dental diseases. He should also know the features of clinical manifestations and patterns of the course of pathological processes in the maxillofacial region in children, as well as methods of treatment and prevention of dental diseases in different age periods.</p>	
3. Purpose and goals of disciplines	
<p>The goal is to master the skills of: diagnosis and treatment of caries and its complications, periodontal tissues in children of different ages; clinical manifestations, methods of diagnosis and differential diagnosis, methods of treatment, selection and use of modern dental materials and medicines and consists in consolidation of practical skills within the limits of the goals defined by the educational and professional training program for specialists in the specialty "Dentistry". On the basis of the final goals for the differential assessment, specific goals are</p>	

formulated in the form of certain skills (actions), target tasks, which ensure the achievement of the final goal of passing industrial medical practice.

The task of practical training in the discipline "Children's therapeutic dentistry" in the 5th course aimed at the formation of integral, general and professional (special) competences and the achievement of the second (master's) level of the field of knowledge 22 - "Health care" specialty defined in the Standard of Higher Education of Ukraine 221 - "Dentistry" of the following learning outcomes.

Competences and learning outcomes, the formation of which contributes to the discipline:

General:

GC 1. Ability to abstract thinking, analysis and synthesis.

GC 2. Ability to communicate in the national language both orally and in writing.

GC 3. Ability to apply knowledge in practical activities.

GC 4. Ability to communicate in the national language both orally and in writing.

GC 5. Ability to communicate in English.

GC 6. Skills in using information and communication technologies.

GC 7. Ability to find, process and analyze information from various sources.

GC 8. Ability to adapt and act in a new situation.

GC 9. Ability to identify, pose and solve problems.

GC 10. Ability to be critical and self-critical.

GC 11. Ability to work in a team.

GC 12. Striving to preserve the environment

GC 13. Ability to act socially responsibly and consciously

GC 14. Ability to realize one's rights and responsibilities as a member of society, to realize the values of a civil (free democratic) society and the need for its sustainable development, the rule of law, the rights and freedoms of a person and a citizen in Ukraine

GC15. Ability to preserve and multiply moral, cultural, scientific values and achievements of society based on understanding the history and patterns of development of the subject area, its place in the general system of knowledge about nature and society and in the development of society, technology and technology, use different types and forms of motor activities for active recreation and leading a healthy lifestyle.

Special (professional, subject):

SC 1. The ability to collect medical information about the patient and analyze clinical data.

SC 2. Ability to interpret the results of laboratory and instrumental research.

SC 3. Ability to diagnose: determine preliminary, clinical, final, accompanying diagnosis, emergency conditions.

SC 4. Ability to plan and carry out measures for the prevention of diseases of the organs and tissues of the oral cavity and maxillofacial region.

SC 5. Ability to design the process of providing medical care: to determine the approaches, plan, types and principles of treatment of diseases of the organs and tissues of the oral cavity and maxillofacial area.

SC 6. The ability to determine a rational regimen of work, rest, and diet in patients in the treatment of diseases of the organs and tissues of the oral cavity and maxillofacial region.

SC 7. The ability to determine the management tactics of patients with diseases of the organs and tissues of the oral cavity and maxillofacial region with concomitant somatic diseases.

SC 8. Ability to perform medical and dental manipulations.

SC 9. The ability to treat the main diseases of the organs and tissues of the oral cavity and maxillofacial area.

SC 10. Ability to organize and carry out medical evacuation measures.

SC 11. Ability to determine tactics, methods and provision of emergency medical aid.

SC 12. Ability to organize and conduct a screening examination in dentistry.

SC 13. The ability to assess the impact of the environment on the state of health of the population (individual, family, population).

SC 14. Ability to maintain regulatory medical documentation.

SC 15. Processing of state, social and medical information.

SC 16. Ability to organize and carry out rehabilitation measures and care for patients with diseases of the oral cavity and ASHL.

SC 17. The ability to legally support one's own professional activity.

SC 18. The ability to provide pre-medical care according to the protocols of tactical medicine.

1. Prerequisites of the discipline

Pediatric dentistry as a discipline:

- a) is based on students' previous study of human anatomy; histology, embryology and cytology, medical biology, medical chemistry, biological and bioorganic chemistry, medical physics, microbiology, virology and immunology, children's diseases and integrates with these disciplines;
- b) lays the foundations for students to study such clinical disciplines as prevention of dental diseases, children's surgical dentistry, therapeutic dentistry, orthodontics;
- c) is based on the study by students of propaedeutics of the dental profile: propaedeutics of children's therapeutic dentistry, propaedeutics of therapeutic dentistry, propaedeutics of orthopedic dentistry and is integrated with these disciplines;
- d) integrates with the following clinical disciplines: prevention of dental diseases, children's surgical dentistry, orthodontics and therapeutic dentistry;
- e) forms an idea of professional responsibility for the quality of treatment of caries and its complications, diseases of periodontal tissues and ENT in children of different ages and the need for widespread introduction of primary prevention of dental diseases.

2. Program learning outcomes

List of learning outcomes

Learning outcome code	Learning outcome code	Learning outcome code
<i>The code is created when filling the syllabus (category: Kn- knowledge; Sk-skills; C-competence; AR-autonomy and responsibility)</i>	<i>Learning outcomes determine that the student must know, understand and be able to perform after graduation. Learning outcomes follow from the set learning goals. To enroll in the discipline, it is necessary to confirm the achievement of each learning outcome</i>	<i>Symbols of the Code of the Program result (PR) of learning outcome the Standard of higher education</i>
Kn-2 Sk-1 C -1, C-2	<i>To isolate and identify the leading clinical symptoms and syndromes: (adentia, bite anomaly, facial asymmetry, tooth pain, hyperesthesia, defects of the crown part of the tooth, tooth discoloration, facial disproportion, change in the shape of the teeth, fistula course, pathological attrition of the teeth, change in the interalveolar height, dental deposits, impaired sucking, swallowing, pathological tooth mobility, gum recession, gum, periodontal, bone pocket); according to standard methods, using the previous data of the patient's history, the data of the patient's examination, knowledge about the person, his organs and systems, establish a probable nosological or syndromic preliminary clinical diagnosis of a dental disease (hyperesthesia, hypoplasia, enamel hyperplasia, fluorosis, erosion of hard tooth tissues, wedge-shaped defect, attrition of teeth, necrosis of hard tissues of the tooth, discoloration, traumatic injuries of teeth, caries, pulpitis, periodontitis, papillitis, gingivitis, localized, generalized) periodontitis, idiopathic periodontal diseases, alveolitis, periostitis, dental injuries.)</i>	PR-1
Kn - 1 Sk - 1 AR - 1	<i>Collect information about the general condition of the patient, evaluate the psychomotor and physical development of the patient, the</i>	PR – 2,

	<p>condition of the organs of the maxillofacial area, based on the results of laboratory and instrumental studies, evaluate information about the diagnosis (analysis of glucose content in the blood, general blood analysis, interpretation of X-ray diagnostics of the skull, dental jaw apparatus, cytological examination of the organs and tissues of the jaw apparatus, microbiological examination of oral fluid, smears from the periodontium, functional diagnosis of the state of the oral cavity (luminescent, rheoperiodontography, stomatoscopy, capillaroscopy, vacuum test, etc. <i>Prescribe and analyze additional</i> (mandatory and optional) methods of examination (analysis of glucose content in blood, general blood test, interpretation of X-ray diagnostics of the skull and maxillofacial apparatus, cytological examination of organs and tissues of the maxillofacial apparatus, microbiological examination of oral fluid, swabs from periodontism, functional diagnosis of the condition of the oral cavity (luminescence, rheoperiodontography, stomatoscopy, capillaroscopy, vacuum test, etc.) of patients with diseases of the organs and tissues of the oral cavity and maxillofacial region for differential diagnosis of diseases (hyperesthesia, hypoplasia, enamel hyperplasia, fluorosis, erosion of the hard tissues of the tooth, wedge-shaped defect, abrasion of teeth, necrosis of the hard tissues of the tooth, discoloration, traumatic injuries of the teeth, caries, pulpitis, periodontitis, papillitis, gingivitis, localized, generalized), periodontitis (localized, generalized), periodontitis, idiopathic periodontal diseases, alveolitis , periostitis, dental injuries).</p>	PR-3
Kn – 1 Sk – 1 AR - 1	<p><i>Diagnose emergency conditions under any circumstances</i> (at home on the street, in a medical institution, in emergency situations, martial law, lack of information and limited time): asphyxia (including newborns); hypertensive crisis; acute respiratory failure; acute heart failure; acute poisoning; "sharp" stomach; electric shock; faint; external bleeding; collapse; coma; swelling of the larynx; Quincke's edema; burns and frostbite; convulsions; drowning; physiological childbirth; shock.</p>	PR – 4 PR - 5
Kn – 2 Sk – 1 C – 1 AR - 1	<p>Carry out and implement dental disease prevention measures among the children's population to prevent the spread of dental diseases.</p>	PR – 6
	<p>Determine the approach, plan, type and</p>	PR- 7

	principle of treatment of dental disease (hyperesthesia, hypoplasia, hyperplasia of enamel, fluorosis, erosion of hard tooth tissues, wedge-shaped defect, tooth abrasion, necrosis of hard tooth tissues, discoloration, traumatic injuries of teeth, caries, pulpitis, periodontitis, papillitis, gingivitis, localized, generalized) periodontitis (localized, generalized) periodontitis, idiopathic periodontal diseases, alveolitis, periostitis, dental injuries) by making a reasoned decision according to existing algorithms and standard schemes.	
Kn – 1 Sk – 1 AR - 1	Determine the approach, plan, type and principle of treatment for: treatment of dental disease by making an informed decision according to existing algorithms and standard schemes.	PR- 8
Kn – 1 Sk – 1 AR - 1	Determine the tactics of managing a dental patient with somatic pathology (pregnancy, anemia, hemophilia, arterial hypertension, infectious endocarditis, heart disease, heart failure, cardiac arrhythmia, the presence of a pacemaker, acute psychosis, including alcoholic delirium, epilepsy, bronchial asthma, diabetes, HIV infection / AIDS, viral hepatitis, diphtheria, tetanus) by making a reasoned decision according to existing algorithms and standard schemes of clinical diagnosis by making a reasoned decision according to existing algorithms and standard schemes. 9. Determine the tactics of managing a dental patient with somatic pathology (pregnancy, anemia, hemophilia, arterial hypertension, infectious endocarditis, heart defects, heart failure, cardiac arrhythmia, the presence of a pacemaker, acute psychosis, including alcoholic delirium, epilepsy, bronchial asthma, diabetes, HIV infection / AIDS, viral hepatitis, diphtheria, tetanus) by making an informed decision according to existing algorithms and standard schemes of clinical diagnosis by making an informed decision according to existing algorithms and standard schemes.	PR- 9
Sk – 1 AR – 1, AR - 2	Determine the tactics of managing a dental patient with somatic pathology (pregnancy, anemia, hemophilia, arterial hypertension, infectious endocarditis, heart disease, heart failure, cardiac arrhythmia, the presence of a pacemaker, acute psychosis, including alcoholic delirium, epilepsy, bronchial asthma, diabetes, HIV infection / AIDS, viral hepatitis, diphtheria, tetanus) by making a reasoned decision according to existing algorithms and standard schemes of clinical diagnosis by making a reasoned decision according to existing algorithms and standard	PR - 10

	schemes.	
Kn – 1 Sk – 1 C – 1 AR – 1, AR - 2	To carry out the treatment of the main dental diseases according to the existing algorithms and standard schemes under the control of the head physician in the conditions of a medical institution (non-carious lesions of teeth, caries of permanent teeth, diseases of the pulp of permanent teeth, periodontitis of permanent teeth, papillitis, gingivitis, periodontitis, periodontitis, traumatic lesions, allergic lesions, alveolitis, pericoronaritis, periostitis, defects of the crown part of the teeth, tooth decay and complete absence of teeth).	PR - 11
Kn – 1 Kn – 2 Sk – 1 AR – 1, AR - 2	The ability to determine the tactics, methods and provision of emergency medical assistance to children	PR - 13
Kn – 1 Sk – 1 AR -1	Analyze and evaluate government, social and medical information using standard approaches and computer information technologies.	PR- 14
Kn – 1 Sk – 1 AR -1	Assess the impact of the environment on the state of health of the population in the conditions of a medical institution according to standard methods.	PR- 15
Kn – 1 Sk – 1 AR -1	To form goals and determine the structure of personal activity based on the result of the analysis of certain social and personal needs	PR- 16
Kn– 1 Sk – 1 AR -1	Follow a healthy lifestyle, use self-regulation and self-control techniques.	PR- 17
Kn – 1 Sk – 1 AR -1	To be aware of and be guided in one's activities by civil rights, freedoms and duties, to raise the general educational cultural level.	PR- 18
Kn – 1 Sk – 1 AR -1	To comply with the requirements of ethics, bioethics and deontology in their professional activities.	PR -19
Kn – 1 Sk – 1 AR -1	To organize the necessary level of individual safety (own and the persons he cares for) in case of typical dangerous situations in the individual field of activity.	PR-20
Kn – 1 Sk – 1 AR -1	The ability to perform medical manipulations based on a preliminary or final diagnosis for children	PR - 21
Kn – 1 Sk – 1 AR - 1	The ability to perform medical dental manipulations based on a preliminary or final diagnosis for children.	PR- 22
Kn – 1 Sk – 1 AR - 1	Perform emergency medical care manipulations using standard schemes under any circumstances based on the diagnosis of an emergency (asphyxia, hypertensive crisis, acute respiratory failure, acute heart failure, fainting, collapse, coma, laryngeal edema, Quincke's edema, convulsions, shock) under conditions of limited time (perform artificial respiration, perform indirect heart massage, fix the tongue, perform injections of medicinal substances	PR- 23

	(intramuscular, subcutaneous, intravenous jet and drip), measure blood pressure;, amputation of the pulp of permanent teeth, alignment of the occlusal surfaces, removal of dental layers, determination of acid resistance of tooth enamel, diathermocoagulation, pulp extirpation of permanent teeth, electroodontology, local anesthesia in the treatment of dental diseases by various methods (application, infiltration, conduction), medical treatment of affected areas of the mucous membrane of the oral cavity and periodontium, application and removal temporary fillings and hermetic bandages in the treatment of caries, pulpitis, periodontitis, application of a rubber dam, obturation of root canals of permanent teeth with various materials, filling of carious cavities of permanent and temporary teeth with various filling materials, coating of teeth with therapeutic and preventive varnishes, gels, desensitizers, preparation and cleaning of root canals of permanent teeth, preparation of carious cavities of permanent and temporary teeth taking into account the type of filling material, ligature bonding of teeth, professional oral hygiene, direct and indirect pulp coating, opening of periodontal abscess, grinding and polishing of all types of fillings sealing materials.	
--	---	--

Kn1 Specialized conceptual knowledge acquired in the process of study and/or professional activity at the level of the latest achievements, which is the basis for original thinking and innovative activity, in particular in the context of research work.

Kn2 Critical understanding of problems in education and/or professional activity and at the border of subject areas.

S1 Solving complex tasks and problems that requires updating and integrating knowledge, often in conditions of incomplete/insufficient information and conflicting requirements.

S2 Conducting research and/or innovative activities.

C1 Clear and unambiguous presentation of one's own conclusions, as well as the knowledge and explanations that substantiate them, to specialists and non-specialists, in particular to persons who are studying.

C2 Use of foreign languages in professional activities.

AR1 Decision-making in complex and unpredictable conditions, which requires the use of new approaches and forecasting.

AR2 Responsibility for the development of professional knowledge and practices, assessment of the team's strategic development.

Conducting method.</p> <p>Make a table of indications and contraindications for the use of anesthesia.</p>	To be able to perform general and local anesthesia in children at an outpatient surgical appointment	Kn-1, Sk-1 C-1. C-2, AR-1, AR -2	<p>Mykola B. Fur, PhD, Assoc. Prof.</p> <p>Olga B. Hrynshyn PhD, Assoc. Prof.</p>

P-7	Tooth extraction operation in children. Indications and contraindications for removal of temporary and permanent teeth, instruments. Peculiarities of tooth extraction in children with concomitant somatic diseases. General and local complications during and after tooth extraction, methods of their treatment and prevention.	To be able to perform a tooth extraction operation in children.	Kn-1, Sk-1 C-1. C-2 AR-1, AR -2	Mykola B. Fur, PhD, Assoc. Prof. Olga B. Hrynshyn PhD, Assoc. Prof.
Iw-7	Describe complications after tooth extraction (bleeding from the socket, socket pain, alveolitis), treatment and prevention.			
P-8	Acute and chronic inflammatory diseases of the maxillofacial area in children. Anatomical and physiological features of the course of inflammatory processes of the maxillofacial region in children. Clinic, diagnosis, differential diagnosis, treatment. To describe the prevention of odontogenic periostitis in children.	Be able to perform draining incisions in acute inflammatory processes	Kn -1, Sk-1 C-1. C-2 AR- 1, AR -2	Mykola B. Fur, PhD, Assoc. Prof. Olga B. Hrynshyn PhD, Assoc. Prof.
Iw-8				
P-9	Traumatic damage to the teeth and bones of children. Methods of diagnosis, treatment	To be able to provide assistance in case of injuries of maxillofacial region	Kn -1, Sk-1 C-1. C-2 AR-1, AR -2	Mykola B. Fur, PhD, Assoc. Prof. Olga B. Hrynshyn PhD, Assoc. Prof.
Iw-9				

3. Verification of study results

Current control

Forms of control and the evaluation system are carried out in accordance with the requirements of the program of industrial medical practice for students of the 5th year of the Faculty of Dentistry and the instructions on the evaluation system of students' educational activities under the credit-transfer system of the organization of the educational process approved by the Ministry of Health of Ukraine

Evaluation of current educational activity. Current control is carried out in accordance with specific goals. The control of the activities of students and its control by the head of practice is keeping a diary of industrial practice. The diary is the main document for the period of industrial practice, including its protection. During the period of practice, students are obliged to write down in a diary every day everything that has been done during the day. In it, in a general section, socially useful work is reflected (issues of sanitary bulletins, writing abstracts, conducting conversations in oral children's groups, etc.). At least twice a week, the student must submit the diary for checking to the assistant (assistant professor) - the head of industrial practice from the department and daily - for signature to the immediate supervisor (dentist from the medical institution). After the end of the industrial practice, drawing up digital and text reports

student is description and review of the diary, signed by the direct supervisor of the production practice and the physician. The characteristics must be certified by the seal of the medical institution where the production practice was carried out. The presence of a duly filled out form and certified by the signature of the supervisor of the practice diary and the final report is mandatory for the admission of the student to the final inspection.

Current evaluation Supervisors of industrial practice analyze the work of students in departments, taking into account their profile (the student must not have missed days of practice), the quality of keeping a diary, the quality of mastering the practical skills determined by the list from each section, the application of the principles of ethical deontology in the practice of a doctor.

Evaluation criteria for self-mastery of practical skills during practice in points according to the list defined in the final report in points:

"5" - is given to a student who has written the proposed number of manipulations and thoroughly described them at a sufficiently high theoretical level.

"4" - is awarded to a student who has written down the proposed number of manipulations and provided them with a theoretical description, but made insignificant mistakes.

"3" - the student who has written the proposed number of manipulations and provided them with a theoretical description, but has made significant mistakes.

"2" - are awarded to a student who has written down the proposed number of manipulations and provided them with a theoretical description, but has made gross and significant mistakes.

A student who has completed 100% of the proposed number of practical skills, presented them in a diary, provided reasonable answers to questions about the content of the diary, and received a minimum of 72 points and a maximum of 120 is admitted to the differential credit for practice.

The differential credit for industrial medical practice of 5th-year students involves the sum of points from practical skills from the list and the number of points during the final control. The maximum number of points that a student can get during the final control is 80, while the Final Control is considered passed if the student has scored at least 50 points.

<i>Learning outcome code</i>	<i>Code type to borrow</i>	<i>Method of verifying learning outcomes</i>	<i>Enrollment criteria</i>
Kn -1 Sk -1	P -1	1. Assessment of students' knowledge level 2. Kn -1 Sk -1	P -9	1. Assessment of students' knowledge level 2. Assessment of mastering of practical skills	Assessment of students' current performance is carried out every day on a 4-point scale using the approved assessment criteria for the relevant discipline and is entered in diary of the practical training.
Final control			
General evaluation system	Participation in work during production practice/ differentiated credit - 60%/40%		
Rating scales	Traditional 4-point scale, multi-point (200-point) scale, ECTS rating scale		
Conditions of admission to the final control	The student attended all practical classes and received at least 72 points for the current academic performance		
Type of final control	Methodology of final control	Enrollment criteria	
Credit	All topics submitted for current control must be included. Grades from a 4-point scale are converted into points on a multi-point (200-point) scale in accordance with the Regulation "Criteria, rules and procedures for evaluating the results of students' educational activities"	The maximum number of points is 200 . The minimum number of points is 120 .	

The maximum number of points that a student can score for the current academic year activity for admission differentiated credit is 200 points.

The minimum number of points that a student must score for the current academic year activity for admission differentiated credit is 120 points.

The number of points is calculated based on the grades received by the student on a 4-point (national) scale during the study of the discipline, by calculation

arithmetic mean (CA), rounded to two decimal places.

The obtained value is converted into points on a multi-point scale as follows:

$$x = \underline{CA} \times 120$$

5

Recalculation of the average grade for the current activity into a multi-point scale for disciplines ending with credit

4-point scale	200-point scale	4-point scale	200-point scale	4-point scale	200-point scale	4-point scale	200-point scale
5	200	4.45	178	3.92	157	3.37	135
4.97	199	4.42	177	3.89	156	3.35	134
4.95	198	4.4	176	3.87	155	3.32	133
4.92	197	4.37	175	3.84	154	3.3	132
4.9	196	4.35	174	3.82	153	3.27	131
4.87	195	4.32	173	3.79	152	3.25	130
4.85	194	4.3	172	3.77	151	3.22	129
4.82	193	4.27	171	3.74	150	3.2	128
4.8	192	4.24	170	3.72	149	3.17	127

Evaluation criteria of an objective structured practical (clinical) exam/a complex of practical-oriented exams

The procedure for conducting the unified state qualification exam (SEC), approved by the order of the Ministry of Health of Ukraine dated 02/19/2019 No. 419, registered in the Ministry of Justice of Ukraine on 03/20/2019 under No. 279/33250.

4. Discipline policy

(Indicates academic integrity policies, specific program policies relevant to the course).

According to the decision of the Academic Council, incentive points can be added to the number of points in the discipline for students who have scientific publications or won prizes for participation in the Olympiad in the discipline among universities of Ukraine, etc.

The points scored on the current test, independent work and the points of the final test are taken into account. At the same time, attendance at classes and the student's activity during practical classes must be taken into account; inadmissibility of absences and lateness to classes; using a mobile phone, tablet or other mobile devices during class for non-educational purposes; plagiarism and plagiarism; untimely performance of the assigned task, etc.

The policy of the academic discipline consists in: mandatory observance of academic integrity by students, namely: independent performance of all types of work, tasks, forms of control provided for by the work program of the academic discipline.

Compliance with the principles and norms of ethics and deontology by students of higher education:

- actions in professional and educational situations taking into account academic integrity and professional ethics and deontology;
- compliance with the internal rules of the clinical base of the department, to be tolerant, friendly and balanced in communication with students and teachers, patients, medical staff of health care institutions.

Attendance of classes by students of higher education: attendance at all classes is mandatory for the purpose of current and final assessment of knowledge (unless there is a valid reason).

Completion of missed classes by students of higher education: Completion of missed classes takes place according to the schedule of practice - rewriting the topic of the class for which the student received a negative grade is held at a time convenient for the teacher and the student outside of classes.
