

Social and educational activities

Curators constantly carry out educational work with students of the medical faculty No.2 in accordance with the approved plan.

They regularly carry out work aimed at raising students' ideological level, nurturing reverence for national traditions, history and culture of Ukraine and Ukrainian medicine, forming well-rounded personalities, and leading a healthy lifestyle.

Curators had carried out thematic discussions with students about the significance and national importance of state and religious holidays, Russia's aggression against Ukraine, the contribution of outstanding Ukrainian doctors to world medical science. The Day of Ukrainian writing and language was celebrated in the way of familiarization with students' favorite poems. The curators of the groups tried to inform young people about the dangers of drug addiction and smoking.
