

HISTORY OF THE DEPARTMENT

The department of propaedeutic and faculty pediatrics was founded in 1956. It was headed by professor Ignatov S.I. at the same time as the department of pediatrics, but after a few months the head of the department was changed for the professor Rudnev I. From 1963 to 1970, the Department was headed by Professor Krasnogorsky M. - a graduate of the Leningrad Military Medical Academy. In 1970 his successor became Professor M. Frishman, who began working at the department as an assistant professor from the first days of its existence. After leaving of the department by prof. Frishman M.M. for the pension, since 1990, the department was headed by prof. Gnateyko O.Z. According to the decision of the Academic Council of the Danylo Halysky' LNMU (Minute No. 5-VR dated June 25, 2014) the name of the department "Propedeutics of pediatric diseases" was changed for "Propedeutics of Pediatrics and Medical Genetics". Since February 2015, the head of the department is professor Lychkovska O.L.

During different periods following associated professors were working in the department Staruch M., Krylova T., Ivanova N., Kalinovska L.S., Kossak B.Y., Bomk AS, Ermakova E.V., Koritko M.I, Smirnova G., Semenova L., Kartysh G., Brunets I. M., Zhaglina A.H., Polishchuk R.S.

Every year 2-3 pediatricians, having finished training in clinical residency, magistracy, postgraduate study, continue to work successfully in health care institutions not only in Lviv and region, but also in other cities of Ukraine and abroad. Post-graduate foreign students of the department are successful practitioners today, supervisors and professors of medical universities in their homeland in Lebanon, Cyprus, Yemen, Sudan, Israel, USA.
