

**ЛЬВІВСЬКИЙ НАЦІОНАЛЬНИЙ МЕДИЧНИЙ УНІВЕРСИТЕТ  
ІМЕНІ ДАНИЛА ГАЛИЦЬКОГО  
КАФЕДРА ТЕРАПЕВТИЧНОЇ СТОМАТОЛОГІЇ**

**ЗАТВЕРДЖУЮ**  
Завідувач кафедри  
професор Зубачик В.М.  
\_\_\_\_\_  
“ ” 2023 р.

**ОБГОВОРЕНО І СХВАЛЕНО**  
на засіданні кафедри  
Протокол № \_\_\_\_  
від “ ” 2023 р.

**КАЛЕНДАРНО-ТЕМАТИЧНІ ПЛАНИ**  
лекцій , практичних занять,  
самостійної роботи та індивідуальної роботи  
з дисципліни „ТЕРАПЕВТИЧНА СТОМАТОЛОГІЯ”  
на осінній семестр 2022-2023 навчального року 4 курс (8 семестр)

**Plans of lectures, practical lessons, out of class work and individual work in  
the discipline „THERAPEUTIC DENTISTRY” for 4-th year  
English-medium students (8<sup>th</sup> semester)**

**LECTURES (6 hours)**

<b>No</b>	<b>Topic of the lecture</b>	<b>Hours</b>	<b>Lecturer Date</b>
1	Etiology, pathogenesis, clinical examination, diagnosis, differential diagnosis of the dystrophic-inflammatory diseases of the periodontium. Methods of treatment. Maintenance care.	2	Docent Ripetska O. 10.02
2	Medical examination system (for the prevention and treatment of diseases) for patients with periodontal diseases. Maintenance care and prophylaxis in periodontology.	2	Docent Ripetska O. 24.02
3	Organization and extend of dental care in military forces of Ukraine in peaceful conditions and during hostilities	2	Docent Ripetska O. 10.03

## PRACTICAL LESSONS

Dystrophic-inflammatory periodontal diseases (generalized periodontitis, periodontosis) – 3,5 credits (105 hours): lectures – 6 hours, practical lessons – 48 hours, self education – 51hours.

№	Topic	Pract. lessons	Individual work
1	Etiology and pathogenesis of dystrophic-inflammatory periodontal diseases. The role of local and general factors	3	3
2	Generalized periodontitis. Classification. Main clinical syndromes of periodontitis.	3	3
3	Clinical-morphological characteristics of different stages of generalized periodontitis.	3	3
4	Analysis of additional methods of diagnosis in patient with generalized periodontitis. Differential diagnosis of generalized periodontitis. Periodontal charts.	3	3
5	General principles of treatment in patients with generalized periodontitis. Working out of treatment plan.	3	3
6	Elimination of local irritants causing periodontal tissues destruction. Traumatic occlusion, diagnostic methods. Correction of malocclusion. Indications. Methods of conducting.	3	4
7	Treatment of symptomatic gingivitis. Medications for local therapy of generalized periodontitis, prescription. Mechanism of action, methods of application depending on the form and course of gingivitis. Periodontal dressings, their types. Indications for their application.	3	3
8	Surgical treatment of generalized periodontitis (curettage, gingivotomy, gingivectomy, flap surgery). Indications. Method of conducting	3	3
9	Prosthetic treatment of generalized periodontitis. Methods of fixation of movable teeth. Temporary splinting.	3	3
10	General pharmacotherapy of generalized periodontitis. Indications. Medications.	3	4

11	Periodontosis. Etiology, pathogenesis. Clinic, diagnosis, treatment. Methods of treatment of teeth hyperesthesia.	3	3
12	Peculiarities of the periodontal treatment of patients with general pathology	3	3
13	Mistakes and complications in the diagnosis and treatment of periodontal diseases.	3	3
14	Organization of physiotherapeutic department. Indications, contraindications for the use of physiotherapeutic treatment. Types of physiotherapy.	3	3
15	Prophylaxis of periodontal diseases. Etiological and pathogenetical prophylactic measures. Dispensary system (for the prevention and treatment of periodontal diseases).	3	2
19	Organization and extend of dental care in military forces in peaceful conditions and during hostilities	3	4
	Total number	48	51

## OUT OF CLASS WORK

(51 hours)

№	Topic	Hours
1.	<u>Preparation for practical lessons – theoretical and practical training.</u>	27
2.	<u>Working-out of practical topics not included in practical classes:</u>	
	- Idiopathic diseases of the periodontal tissues.	4
	- Tumors of the periodontal tissues. Clinical signs, diagnosis, treatment	4
	- Treatment of gingival recession	4
	- Methods of elimination of periodontal pockets	4
	- Prosthetic local treatment. Occlusal adjustment, coronoplasty, splinting. Methods of conduction.	4
	- Algorithms of individual hygiene of oral cavity in different conditions of periodontal tissues.	4

## INDIVIDUAL WORK RECOMMENDED FOR STUDENTS

<b>№</b>	<b>Topic</b>
1.	Placing of non-hardening and hardening periodontal dressings in the treatment of periodontal diseases.
2.	Forms and methods of sanitary and educational work.
