

**ЛЬВІВСЬКИЙ НАЦІОНАЛЬНИЙ МЕДИЧНИЙ УНІВЕРСИТЕТ
ІМЕНІ ДАНИЛА ГАЛИЦЬКОГО
КАФЕДРА ТЕРАПЕВТИЧНОЇ СТОМАТОЛОГІЇ**

Затверджую
завідувач кафедри
професор Зубачик В.М.

«_31_» серпня ____ 2023 р.

Обговорено і схвалено
на засіданні кафедри
протокол № 1
від « 31 » серпня 2023р.

ТЕМАТИЧНИЙ ПЛАН

практичних занять з виробничої лікарської практики за індивідуальним профільним курсом практичної підготовки «Ортопедична стоматологія» на осінній семестр 2023-2024н.р.

Vкурс (9 семестр) . Кредитів -5 (150 год), практичних -75 год, СРС – 75 год. Вид контролю - диференційований залік

THEMATIC PLAN

of practical lessons during the internship in discipline „ THERAPEUTIC DENTISTRY” for 5-year English-medium students (9-th semester), 2023-2024
Individual profile elective course “Prosthetic Dentistry”

5 credits (150 hours), practical lessons – 75 hours, out of class work – 75 hours.

№	Topic of the lesson	hours
1.	Ergonomics. Aim and tasks of Ergonomics. Instructions on safety measures during the work. Clinical anatomy and histology of the dental hard tissues. Physiology of the dental hard tissues. Tooth embryogenesis.	6
2.	Modern aspects of etiology and pathogenesis of dental caries. Diagnosis, treatment, and prevention of caries.	5
3.	Modern filling materials. Treatment of caries. Peculiarities of teeth restoration. Rubber-dam. Working out practical skills.	6
4.	Modern filling materials. Composites. Glass-ionic cements. Compomers. Cermets. Enamel-dentin adhesives. Patient’s treatment. Treatment of the caries and non-cariou defects. Peculiarities of teeth restoration. Rubber-dam. Post-systems, inlays, veneers in restorative treatment. Treatment of patients.	6
5.	Pharmacodynamics of the medications, which are used in therapeutic dentistry. Prescriptions.	6
6.	Endodontics. Morphological aspects (roots canal anatomy). Clinic and diagnostic of the pulpitis.	6
7.	Main principles of endodontic treatment.	5
8.	Modern endodontic instrumentation, its classification.	6
9.	Principles of diagnostic, treatment, and prevention of the apical periodontitis.	6

	Endo-periodontal surgery. Practice of practical skills.	
10	Anatomical-morphological and physiological peculiarities of the periodontium.	6
11.	Complex examination of patients with periodontal diseases.	5
12.	Modern ideas on etiology and pathogenesis of the periodontal disease. Classification of the periodontal diseases. Clinical-morphological peculiarities of the main stages of generalized periodontitis.	6
13	Complex treatment and prevention of periodontal disease. Organization of patients care in periodontal pathology. Patient's treatment.	6
	Total	75

**THEMATIC PLAN OF OUT OF CLASS (INDEPENDENT) WORK
(75 hours)**

№	Topic
1.	Isolation of the working field in tooth restoration and endodontic treatment. Rubber-dam.
2.	Theories of caries development and pathogenesis. Modern views on dental caries.
3.	Multiple caries. Treatment. Prophylaxis.
4.	Individual and general prophylaxis of dental caries. Prophylactic measures in pregnancy, and in the workers of harmful enterprises.
5.	Dental plaque and caries. Removal methods. Index assessment. Professional hygiene.
6.	Teeth discolorations. Etiology. Treatment.
7.	Modern techniques of teeth whitening. Indications, contraindications. Advantages and disadvantages.
8.	Peculiarities of the treatment of apical periodontitis.
9.	Indications for the use of computed tomography. Advantages of the method.
10.	Treatment plan in periodontal diseases.
11.	Periodontal dressings.
12.	Peculiarities of periodontal treatment in young and older age.
13.	Methods and means of individual oral hygiene in periodontal diseases.
