

**ЛЬВІВСЬКИЙ НАЦІОНАЛЬНИЙ МЕДИЧНИЙ УНІВЕРСИТЕТ
ІМЕНІ ДАНИЛА ГАЛИЦЬКОГО
КАФЕДРА ТЕРАПЕВТИЧНОЇ СТОМАТОЛОГІЇ**

**ЗАТВЕРДЖУЮ
СХВАЛЕНО**

Завідувач кафедри
професор Зубачик В.М.

“ 10 ” 01 2022р.

ОБГОВОРЕНО І

на засіданні кафедри
Протокол № __
від “ 10 ” 01 2022р.

КАЛЕНДАРНО-ТЕМАТИЧНІ ПЛАНИ

лекцій , практичних занять,
самостійної роботи та індивідуальної роботи
з дисципліни „ПАРОДОНТОЛОГІЯ”
на осінній семестр 2021-2022 навчального року 4 курс (8 семестр)

**Plans of lectures, practical lessons, out of class work and individual work in
discipline „PERIODONTOLOGY” for 4-th year
English-medium students (8th term)**

LECTURES (10 hours)

No	Topic of the lecture	Hours	Date
1	Etiology, pathogenesis, clinical examination, diagnosis, differential diagnosis of generalized periodontitis.	2	Doc. Baryliak A. 10.02
2	Local and general (complex) treatment of generalized periodontitis. The use of physical factors in complex treatment of periodontal diseases. Surgical and prosthetic treatment of generalized periodontitis.	2	Doc. Baryliak A. 24.02
3	Periodontosis. Etiology, pathogenesis, clinic, diagnosis, treatment. Idiopathic diseases. Periodontal tumors.	2	Doc. Baryliak A. 10.03

4	Dispensary system (for the prevention and treatment of diseases) for patients with periodontal diseases. Maintenance care and prophylaxis in periodontology.	2	Doc. Baryliak A. 24.03
5	Organization and extend of dental care in military forces of Ukraine in peaceful conditions and during military operations.	2	Doc. Baryliak A 07.04

PRACTICAL LESSONS

Dystrophic-inflammatory periodontal diseases (generalized periodontitis, periodontosis) – 3,5 credits (105 hours): lectures – 10 hours, practical lessons – 56 hours, self education – 39hours.

№	Topic	Pract. lessons	Individual work
1	Etiology and pathogenesis of dystrophic-inflammatory periodontal diseases. The role of local and general factors	3	2
2	Generalized periodontitis. Classification. Main clinical syndromes of periodontitis.	3	2
3	Clinical-morphological characteristics of different stages of generalized periodontitis.	3	2
4	Analysis of additional methods of diagnosis in patient with generalized periodontitis. Differential diagnosis of generalized periodontitis.	3	2
5	General principles of generalized periodontitis treatment. Working out of treatment plan.	3	4
6	Elimination of local irritants causing periodontal tissues destruction. Traumatic occlusion, diagnostic methods. Correction of malocclusion. Indications. Methods.	3	2
7	Treatment of symptomatic gingivitis. Medications for local therapy of generalized periodontitis, their prescription. Pharmacodynamics of medications.	3	2
8	Periodontal dressings, their types. Indications for their application.	3	2
9	Surgical treatment of generalized periodontitis	3	2

	(curettage, gingivotomy, gingivectomy, flap surgery)		
10	Prosthetic treatment of generalized periodontitis. Methods of fixation of movable teeth. Temporary splinting.	3	2
11	General pharmacotherapy of generalized periodontitis. Indications. Medications.	3	2
12	Periodontosis. Etiology, pathogenesis. Clinic, diagnosis, treatment.	3	2
13	Idiopathic diseases. Clinic, diagnosis, differential diagnosis, treatment principles.	3	2
14	Periodontal tumors. Mistakes and complications in diagnostic and treatment of periodontal disease.	3	2
15	Peculiarities of treatment of periodontal diseases complicated with systemic diseases of the organism.	3	4
16	Mistakes and complications in the treatment of periodontal diseases.	3	2
17	Organization of physiotherapeutic department. Indications, contraindications for the use of physiotherapy methods of treatment. Types of physiotherapy.	3	2
18	Prophylaxis of periodontal diseases. Etiological and pathogenetical prophylactic measures. Social prophylactic measures. Dispensary system (for the prevention and treatment of periodontal diseases).	3	2
19	Organization and extend of dental care in military forces in peaceful conditions and during military operations.	2	3
	Total number	56	39

OUT OF CLASS WORK

(41 hours)

№	Topic	Hours
1.	<u>Preparation for practical lessons – theoretical and practical training.</u>	26
2.	<u>Working-out of practical topics not included in practical classes:</u> - Idiopathic diseases of the periodontal tissues. - Methods of elimination of periodontal pockets and gingival recession. - Surgical procedures. Gingivotomy. Gingivectomy. Methods of conduction. - Prosthetic local treatment. Occlusal adjustment, coronoplasty,	3 3 2 2

	splinting. Methods of conduction. - Algorithms of individual hygiene of oral cavity in different conditions of periodontal tissues.	3

INDIVIDUAL WORK

№	Topic
1.	Placing of non-hardening and hardening periodontal dressings in the treatment of periodontal diseases.
2.	Forms and methods of sanitation-instructive work.
