

CONTROL METHODS

Speciality 221 – «Dentistry»

Control methods include **current and final semester control**.

1. Current control

This control action is carried out every lesson. The level of understanding of grammatical material by a student, the ability to formulate questions on the subject and give an answer to it, the quality of homework is marked.

Evaluation of current educational activity. In evaluating the knowledge of each topic for current educational activity the student gets marks by the 4-point (traditional) scale taking into account the approved evaluation criteria for the relevant discipline. This takes into account all types of work, provided by the curriculum. The student must obtain a mark for each topic. Evaluation forms of current educational activity should be standardized and include control of theoretical and practical skills. Marks put by the traditional scale are converted into points.

For subjects which have form of the final control the credit:

The maximum number of points for the subject that a student can receive for current educational activity is 200 points.

The minimum number of points that a student should collect for current educational activity to pass the course is 120 points.

Calculating the number of points is based on student's marks received by traditional scale for the semester, by calculating the arithmetical mean (AM), rounded to two decimal units. The resulting value is converted into points by multi-scale as follows:

$$x = (AM \times 200): 5$$

For subjects which have form of the final control examination:

The maximum number of points that a student can receive for current educational activity per semester and be admitted to the exam is 120 points.

The minimum number of points that a student must collect for current educational activity per semester for admission to the exam is 72 points.

Calculating the number of points is based on student's marks received by traditional scale while learning subject by calculating the arithmetical mean (AM), rounded to two decimal units. The resulting value is converted into points by multi-scale as follows:

$$x = (AM \times 120): 5$$

Independent work of students is evaluated during the current control of theme on the appropriate lesson. Learning of themes which are declared only for independent work are controlled at the final control.

2. Final control

Final control is carried out to assess learning outcomes at a particular educational qualification level and at its individual completed stages according to the national scale and the scale ECTS. Final control includes semester control.

Semester control is carried out in the forms of semester exam or test (differentiated test) in the amount of educational material specified by the working program of the course and in the terms established by the working curriculum, the individual curriculum of the student.

Semester credit – a form of the final control, which is to assess the knowledge of educational material on Ukrainian on the basis of the fulfilment of all types of educational works

provided in a working curriculum. Semester credit (II-nd semester) is marked by the results of the current control.

Semester exam – a form of final control which is to assess the knowledge of the theoretical and practical material of the course for semester. A student is considered to be admitted to the semester exam on discipline if he/she attended all classroom lessons according to curriculum of the course, performed all kinds of work envisaged by the working program of the discipline and during the study for the semester received not less than the minimum (72 points).

Semester examination is conducted in writing during the examination session in accordance with schedule. The form of the exam is standardized and includes control of theoretical and practical skills (IV semester).

The maximum number of points that a student can get during the exam is 80.

The minimum number of points during the exam - not less than 50.
